

501 PR344Processing Purchase Orders

Instructor Led Training

Welcome to Cardinal Training

This training provides participants with the skills and information necessary to use Cardinal and is not intended to replace existing Commonwealth and/or agency policies.

This course, and the supplemental resources listed below, are located on the Cardinal website (www.cardinalproject.virginia.gov) under Learning.

Cardinal Reports Catalogs are located on the Cardinal website under Resources:

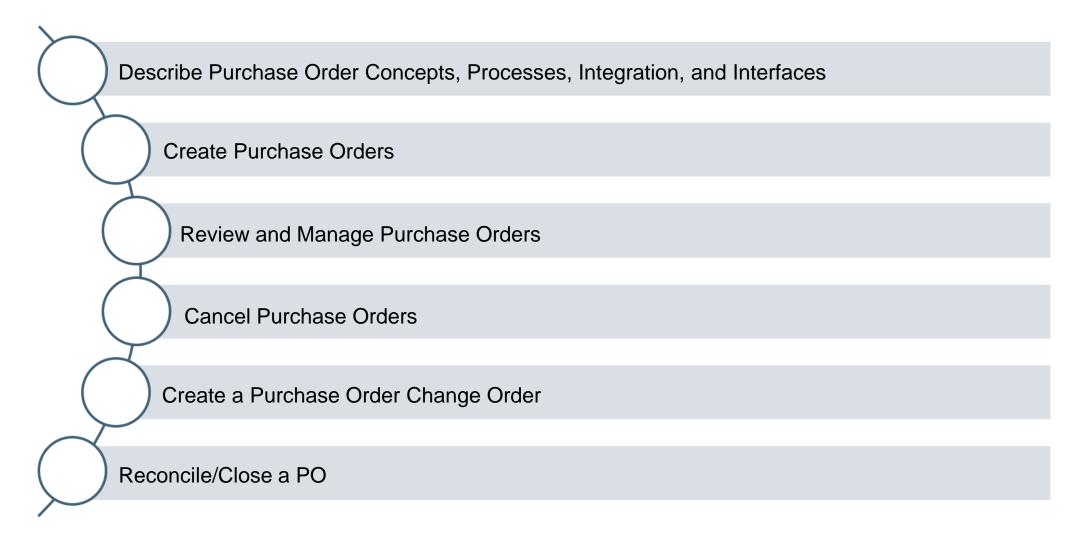

- Instructor led and web based training course materials
- Job aids on topics across all functional areas
- Glossary of frequently used terms

The Cardinal screenshots included in this training course show system pages and processes that some users may not have access to due to security roles and/or how specific responsibilities relate to the overall transaction or process being discussed.

For a list of available roles and descriptions, see the Statewide Cardinal Security Handbook on the Cardinal website in the Security section under Resources.

Course Objectives

After completing this course, you will be able to:

1	Understand Purchase Orders	
2	Process Purchase Orders	
3	Maintain and Modify (Change Orders) Purchase Orders	
4	Reconcile/Close a PO – 3 Way Match	
5	Review Purchase Order Information, History, and Activities	

1

Understand Purchase Orders

This lesson covers the following topics:

- Procurement Overview
- Key Concepts
- Procurement Process Overview
- Purchase Order Process
- Integration with Accounts Payable
- Interfaces with eVA and SiteManager

Procurement Overview

The Procurement functional area of Cardinal includes four modules:

Purchasing

The Purchasing module includes the buying of goods and services (Procurement) by creating and processing requisitions, purchase orders (PO), receipts, procurement card (PCard), and Integrated Supply Services Program (ISSP) transactions.

eProcurement

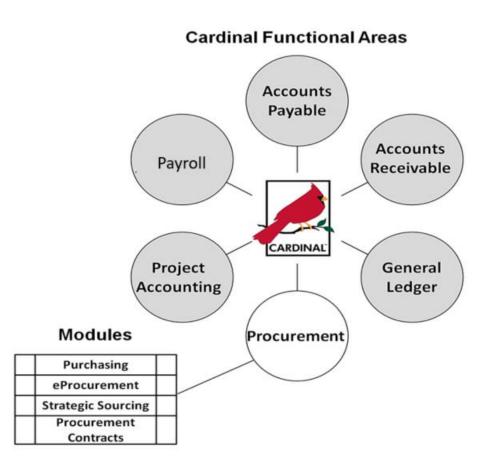

Like Purchasing, the eProcurement module provides for Procurement but is web-based. It is similar to an online shopping cart experience for users requesting goods and/or services.

Strategic Sourcing

The Strategic Sourcing module allows users to create and award bids/proposals to purchase orders or contracts.

Procurement Contracts

The Procurement Contracts module builds, manages, and archives all Cardinal contract related information.

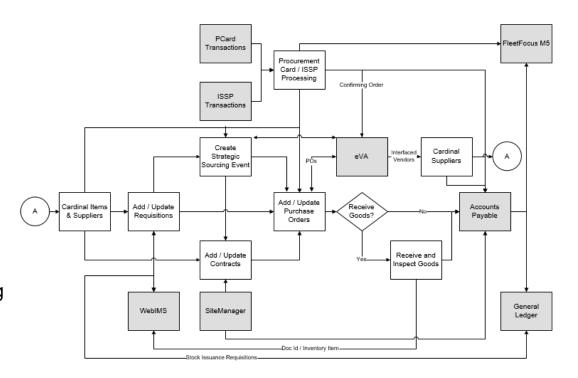

- Cardinal interfaces with external systems (eVA, SiteManager, etc.) daily, which eliminates duplicate entries in multiple systems.
- The Statewide procurement supplier database is updated by eVA daily and maintained by the Commonwealth Supplier Group (CVG). It is shared with all agencies. Fiscal suppliers (non-procurement suppliers) are created directly in Cardinal by the Commonwealth Vendor Group (CVG). The suppliers are shared between the Accounts Payable and the Procurement functional areas.

Procurement Process Overview

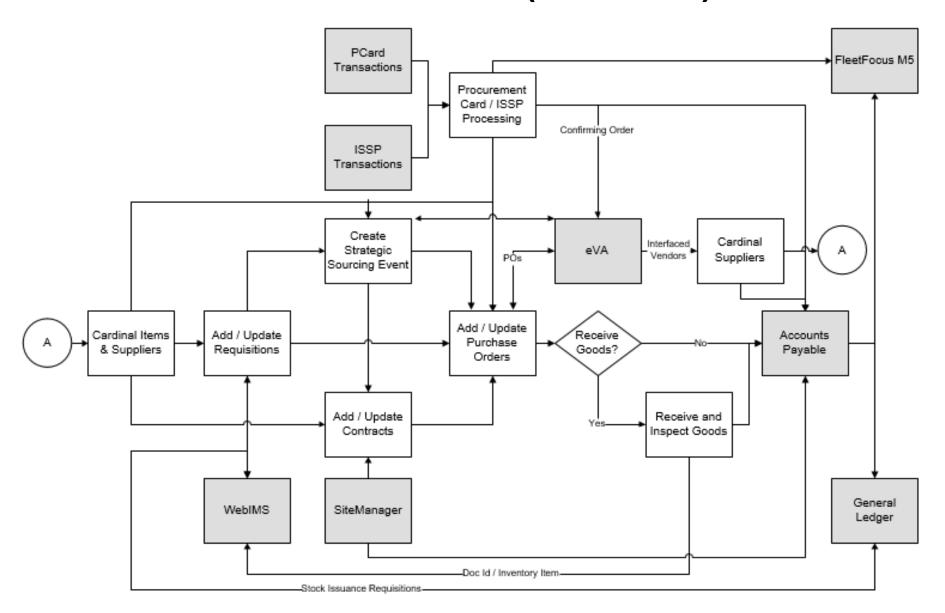

There are seven key processes in procurement:

- Add/Update Requisitions
- Create Strategic Sourcing Events
- Add/Update Contracts
- Add/Update Purchase Orders
- Receive/Inspect Goods
- Procurement Card Processing
- Integrated Supply Services Program (ISSP) Processing

Procurement Process Overview (continued)

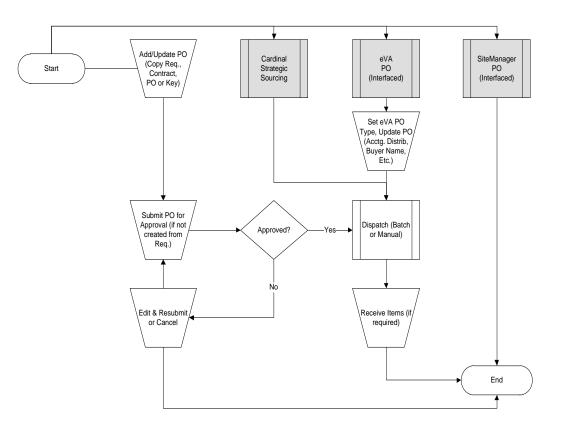

Using the Purchasing module, a PO can be created online that converts requests for goods and/or services into POs.

As POs proceed from entry to dispatch, Cardinal tracks details and collects analysis information to facilitate future purchases.

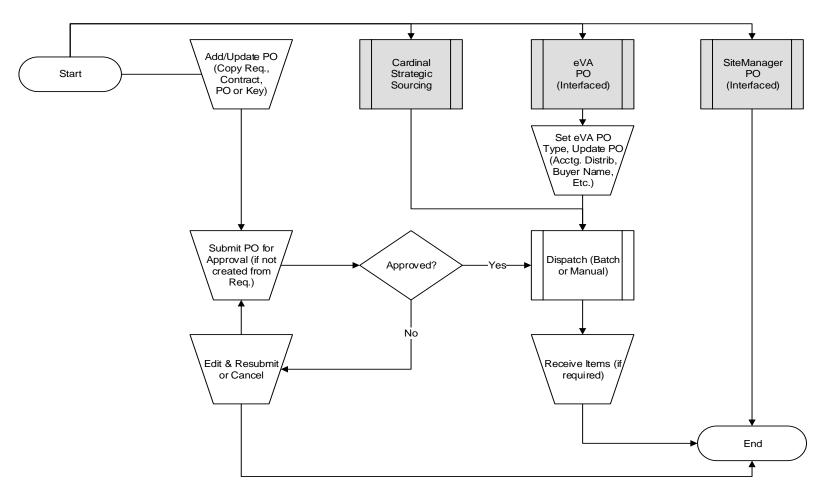

- PO key components include a header, lines, schedules, and distributions.
- A PO is identified by an ID that is unique within a purchasing business unit.
- Cardinal automatically generates a PO ID number.

Note: POs keyed into Cardinal, Strategic Sourcing POs, and SiteManager POs are interfaced to eVA after being dispatched. (Only R01 type POs transmit to eVA.)

Purchase Order Process (continued)

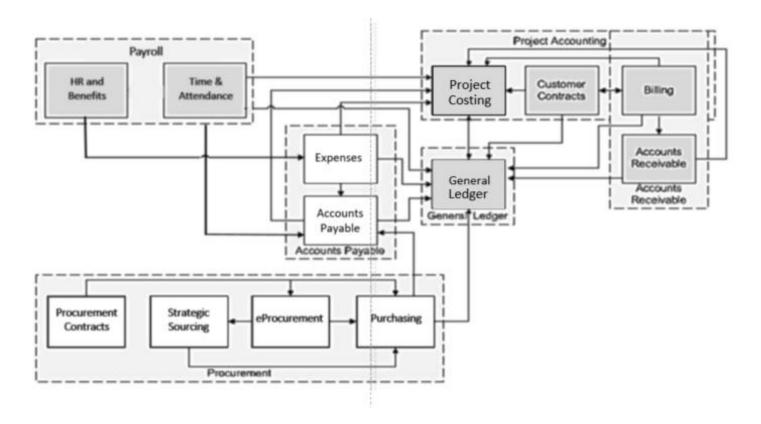

Note: Cardinal POs, Strategic Sourcing POs, and SiteManager POs are interfaced to eVA after being dispatched. (Only R01 type POs transmit to eVA.)

Integration with Accounts Payable

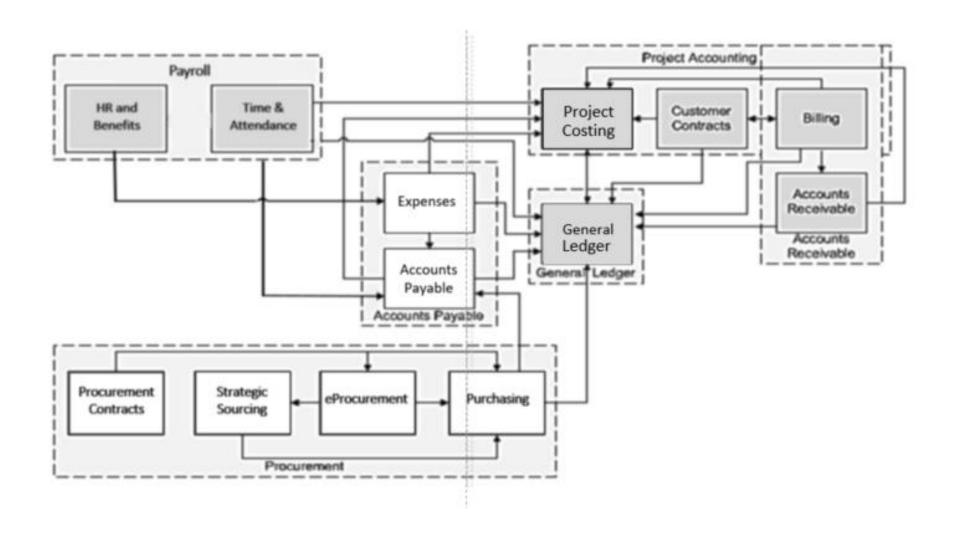

Processing a PO involves the Accounts Payable module in the matching process. Matching ensures that payment is made for what was ordered and received by comparing vouchers with POs and receiving documents.

- Two-way matching: For POs that do not require receiving, the PO and voucher are compared. (i.e. professional services
 and SiteManager).
- Three-way matching: For POs that have receiving, the PO, receipt, and voucher are compared.

Integration with Accounts Payable (continued)

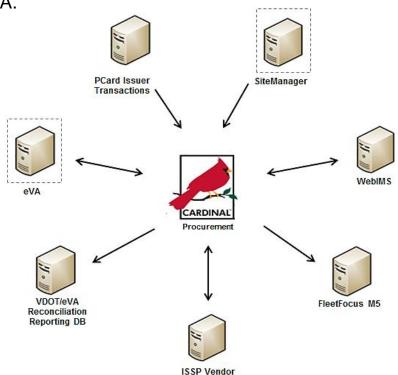

Interfaces with eVA and SiteManager

The PO process interfaces with eVA:

- POs and change orders that are created in eVA are imported daily from eVA.
- POs and change orders created in Cardinal are exported to eVA.
 This interface does not send attachments.
- When required, a designated Administrative Services
 Division (ASD) staff member uploads attachments into eVA.
- In Cardinal only accounting distribution changes can be made to POs that originated in eVA. All other changes to an eVA PO are made in the eVA system and interfaced back into Cardinal.

The PO process interfaces with SiteManager:

 SiteManager sends construction and maintenance contract records to Cardinal, where it is used to create contracts and POs.

Lesson 1: Checkpoint

Now is your opportunity to check your understanding of the course material. Read the question and make note of your answer below.

1. _____ is a commitment from an agency to suppliers to purchase goods or services from that supplier.

2. _____ are the four components of a purchase order.

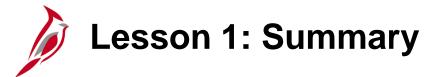

3. Who can create a PO?

Lesson 1: Checkpoint (continued)

4. Who can create a requisition?

1

Understand Purchase Orders

In this lesson, you learned:

- Processing Purchase Orders
- Purchasing Key Concepts
- Procurement functional areas modules: Purchasing, eProcurement, Strategic Sourcing, and Procurement Contracts
- Change orders are used to add items, increase/decrease quantities, and change prices or ship to values
- How Purchasing integrates with Accounts Payable
- How Purchasing interfaces with eVA and SiteManager

2

Processing Purchase Orders

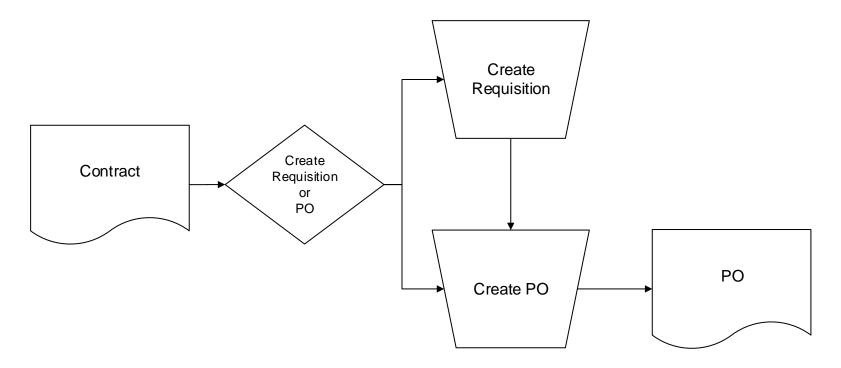

This lesson covers the following topics:

- Purchase Order Basics
- Creating Purchase Orders
- Managing eVA Purchase Orders
- Submitting Purchase Orders for Approval
- Dispatching and Printing Purchase Orders

Purchase Order Basics

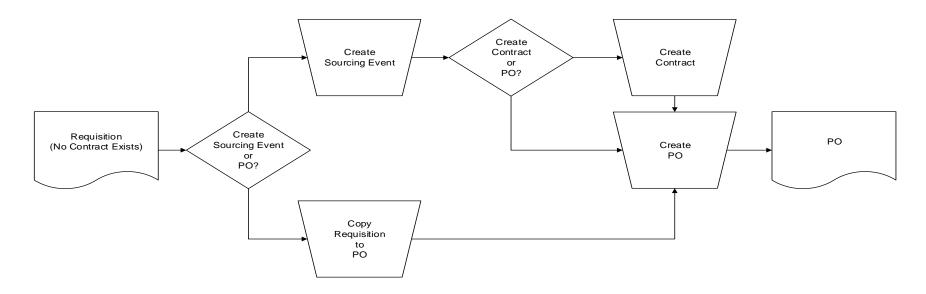

- Purchase Orders (POs) are commitments from an organization to suppliers to purchase goods or services from that supplier. The purchase information, such as item, quantity, freight terms, shipping terms, payments terms, and shipping instructions, is listed on the document and is part of the contractual nature of the PO.
- All purchases must have a purchase order, but not all purchase orders need a requisition. If a good or a service is
 already on contract, a requisition is not generally required. Exception: All inventory issue and restock transactions must
 be done using a requisition.

Purchase Order Basics (continued)

- When a contract already exists, a requisition is not always necessary. A purchase order can be created against the contract and avoid additional steps.
- When a contract does not exist, the end user has two options after the requisition is created:
 - Create a Sourcing Event Once approved, the requisition goes through a solicitation process, which involves
 creating a sourcing event. This process allows suppliers to bid against the event. Winning bidders are awarded a
 contract or purchase order.
 - Copy the Requisition to Purchase Order When the value of goods or services falls within the range of a small purchase, or is otherwise permitted in accordance with the Agency Procurement and Surplus Property Manual (APSPM), the Buyer can copy the requisition directly into the PO, rather than creating a sourcing event and awarding a contract.

Creating Purchase Orders

There are three ways to create a PO:

- Key directly into Cardinal
- Copying a:
 - Requisition Use an existing requisition as a template to create a new PO. This creates an electronic link from the PO to the requisition.
 - Purchase order Copy an existing PO to order the same items.
 - Contract Copy from an existing contract to save time on data entry. Multiple contracts can be copied into an existing PO.
- Award a Strategic Sourcing event to a PO (i.e. Invitation For Bid).

Navigate to create a PO using the following path:

Main Menu > Purchasing > Purchase Orders > Add/Update POs

Purchase Orders can be set to quantity or to amount only. Using amount only allows for the receipt by invoice amount.

Receive by Quantity

If ordering inventory or items that are specific by count, establish a PO with a predetermined quantity of items at a fixed rate/price per item. Therefore, set your PO to receive based on the quantities delivered or completed.

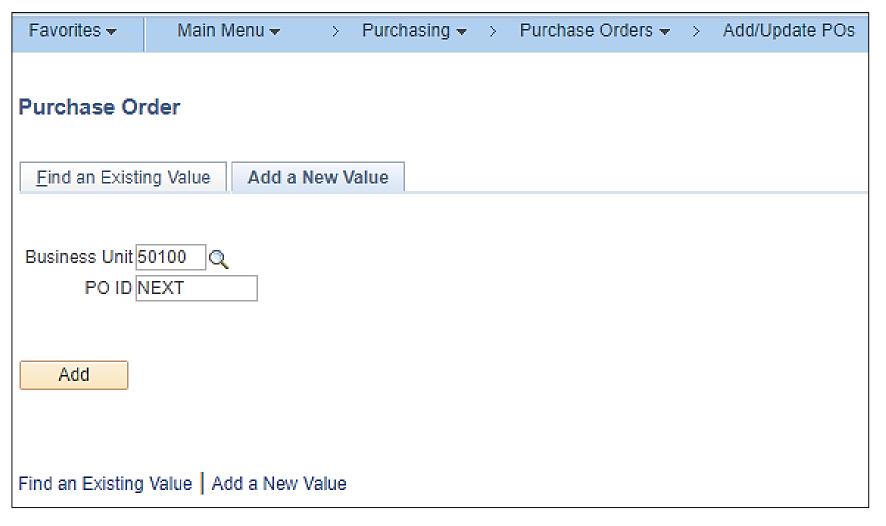

Receive by Amount

If ordering a service or project that is based on a lump sum, you would establish a PO that allows receiving of the invoice amounts (dollar), not the quantity. Therefore, set the PO to **Amount Only** and receive the invoice amount based on the dollars only.

For more detailed information about creating purchase orders, see the job aid entitled **501 PR344: Purchase Orders** located on the Cardinal website in **Job Aids** under **Learning**.

The first page of the **Purchase Order** opens to the **Add a New Value** tab. The **Business Unit** field defaults to the agency (i.e., **50100** for VDOT) and **PO ID** defaults to **NEXT**. Cardinal will create the **PO ID** number automatically. Do not change the PO ID.

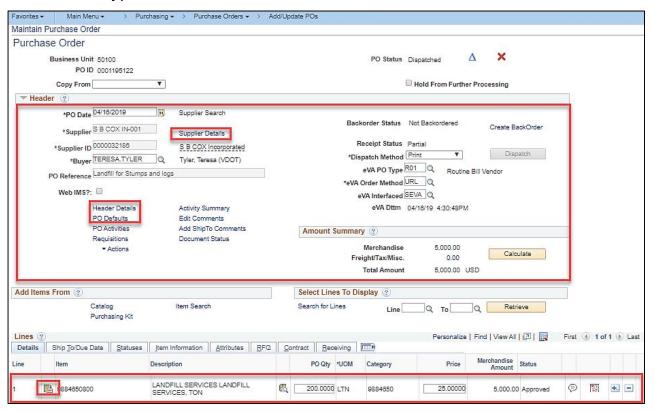

Purchase Order (PO):

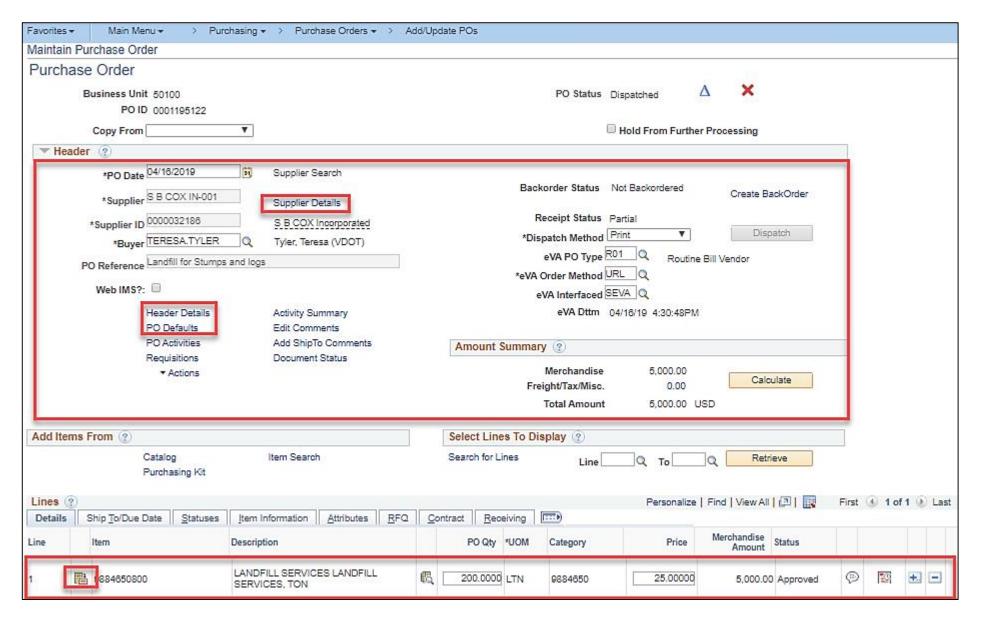

A Purchase Order is composed of several sections, including the **Header**, **Lines**, **Schedule**, and **Distribution** information.

We will also discuss Supplier Details, Header Details, PO Defaults, and Line Details.

Options include add, update, and cancel PO lines, as well as correct PO data such as PO lines, quantities, price, distributions, ship to locations, eVA purchase order type, and comments, as needed.

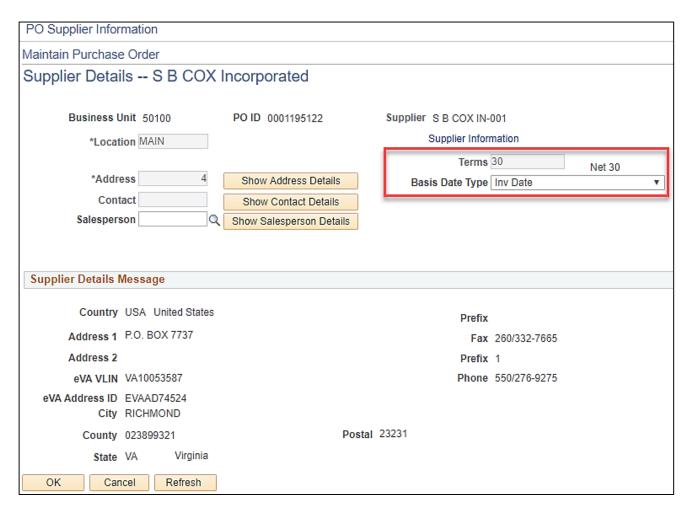

Creating Purchase Orders: Supplier Details

From the Maintain Purchase Order – Purchase Order page, clicking on the Supplier Details hyperlink displays the Maintain Purchase Order – Supplier Details pop-up window. This window allows viewing or editing the supplier Location, Address, Contacts, and payment terms.

For construction and professional services purchase orders, the **Terms** are set to **00** (**Due Immediately**) and the **Basis Date Type** is set to **Inv Date**.

For goods and services, the payment terms are set to **30 Days** and **Prompt Payment** type.

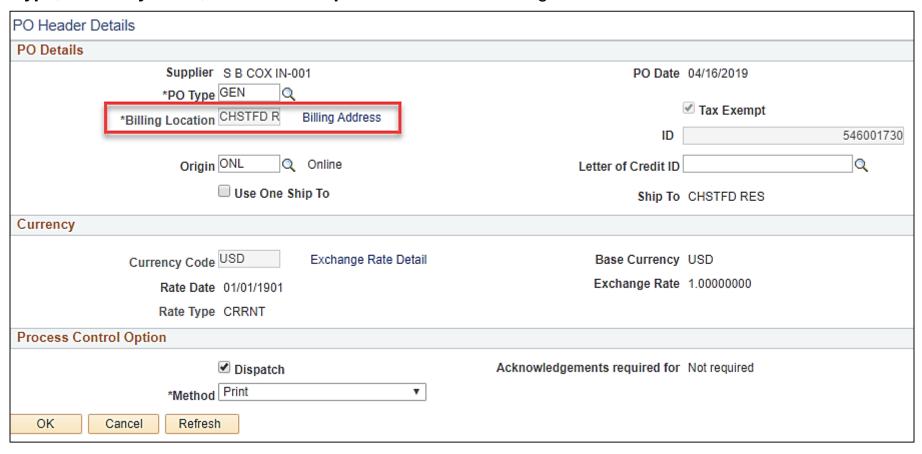

Creating Purchase Orders: Header Details

From the **Maintain Purchase Order – Purchase Order** page, clicking on the **Header Details** hyperlink displays the **PO Header Details** pop-up window. This window displays the **Billing Location** which defaulted based on preconfigured Buyer preferences. View or edit the location as necessary.

The PO Type, Currency Code, and Tax Exempt ID should not be changed.

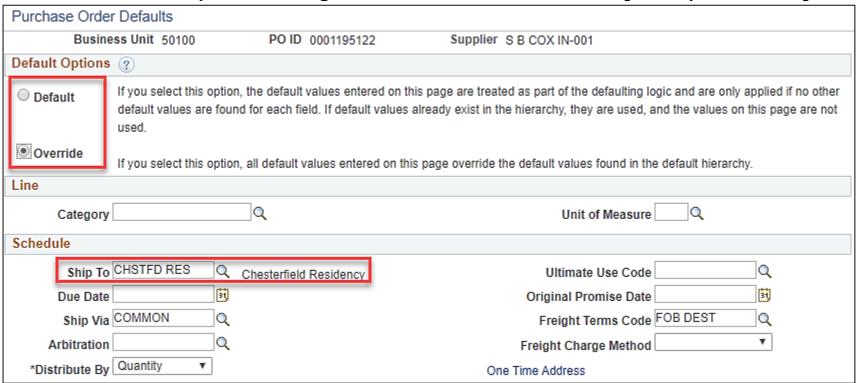

Creating Purchase Orders: PO Defaults

From the **Maintain Purchase Order – Purchase Order** page, clicking on the **PO Defaults** hyperlink opens the **Purchase Order Defaults** pop-up window. This window displays the **Ship To** location which defaulted based on preconfigured Buyer preferences. View or edit the location as necessary.

In the **Default Options** section, a **Default** chart of accounts may be set for all line items on the PO or **Override** defaulting values or existing chart of accounts when copying in a PO.

In the **Schedule** section, the **Ship Via** and **Freight Terms Code** default and should generally not be changed.

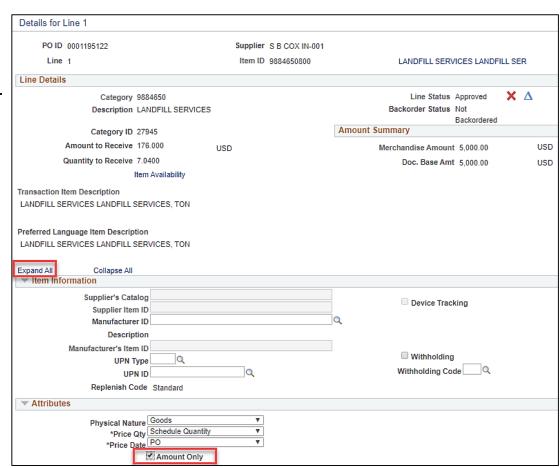

Creating Purchase Orders: Line Details

From the **Maintain Purchase Order – Purchase Order** page, clicking on the **Line Details** icon to the left of each PO line opens the **Details for Line** pop-up window.

This window shows all information related to the PO line on just one page, instead of clicking through the tabs.

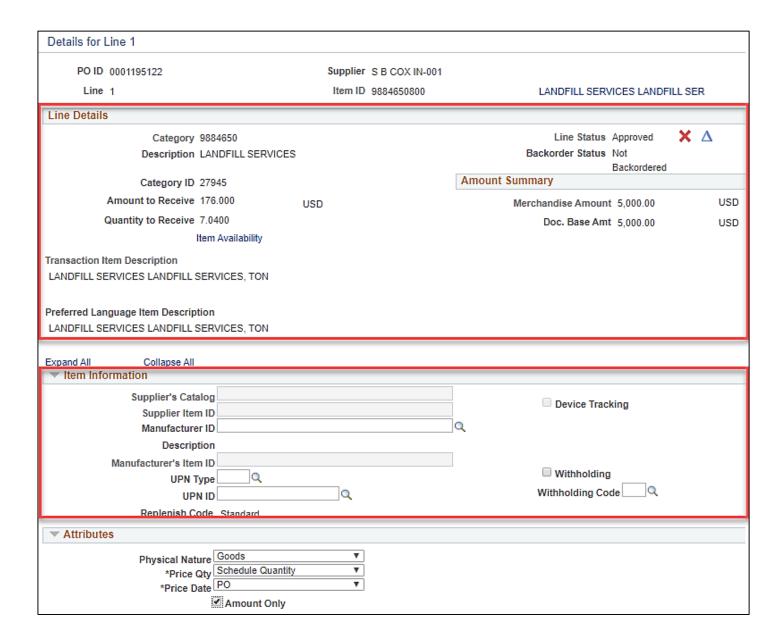

Use the **Expand All** hyperlink to expand the page.

In this example, the **Amount Only** checkbox is checked.

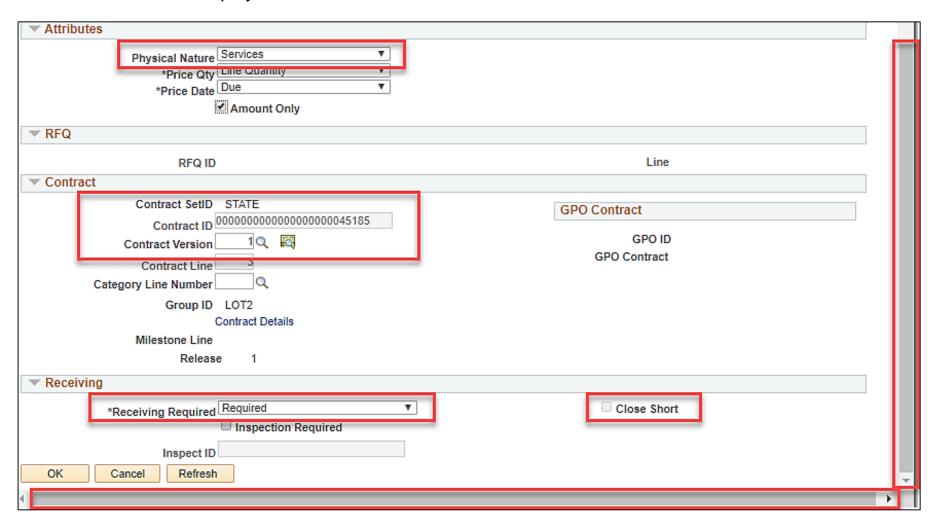

Creating Purchase Orders: Line Details (continued)

Creating Purchase Orders: Additional Details

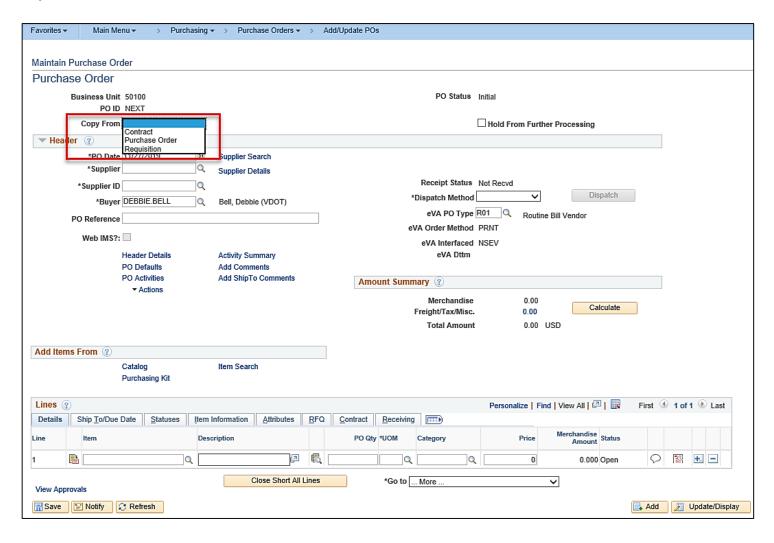

After clicking on **Expand All** on the **Maintain Purchase Order – Line Details** page by scrolling down, you can see additional details related to the PO line are displayed.

Creating Purchase Orders: Copy From

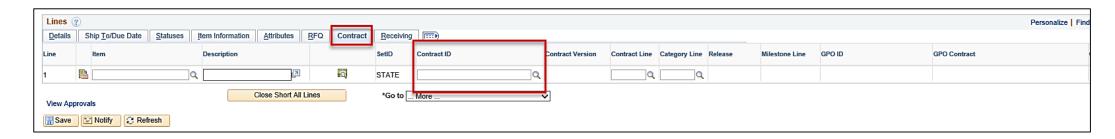

From the **Maintain Purchase Order – Purchase Order** page, create a PO by copying it from an existing document using the **Copy From** drop-down menu.

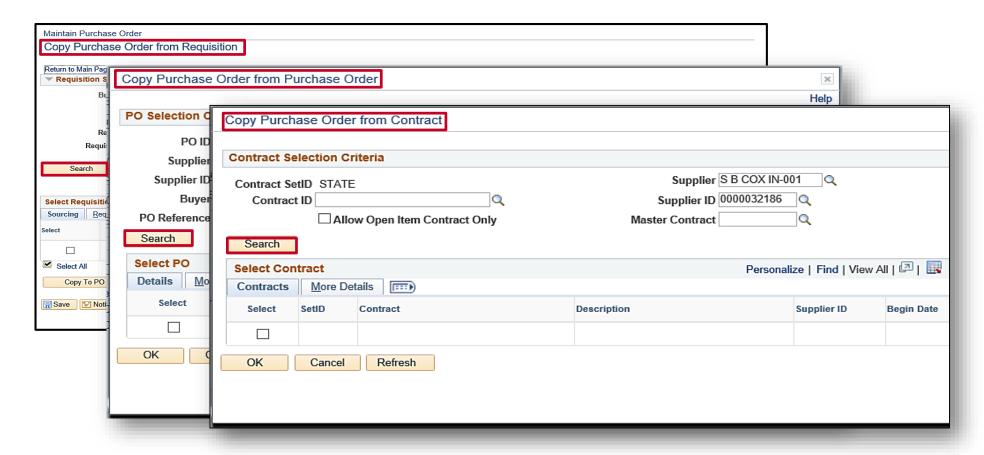

Steps to copy from an existing document:

- When copying from a Requisition or Contract, enter the Supplier ID first.
- Click the Copy From drop-down menu.
- Select the type of document to be copied from (Contract, Purchase Order, or Requisition). The Copy Purchase Order from Requisition, Purchase Order, or Contract page will open. When copying from a Contract, copy the entire contract. For more detailed information about copying a single line from a contract, see the job aid entitled 501 PR344: Purchase Orders located on the Cardinal website in Job Aids under Learning.
- When copying a line from a contract, note that the contract selection displays on one tab. After completing the copy enter
 the Contract ID on the Maintain Purchase Order Purchase Order page in the Lines section, Contract tab, to
 associate it to the contract.

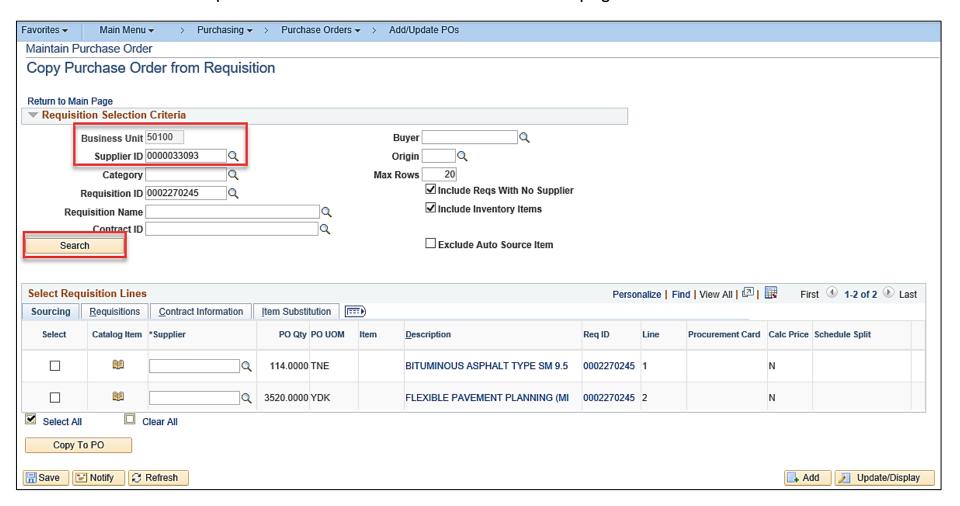

After selecting the type of document to be copied from, a search page appears. The page will be based on the type of document to be copied.

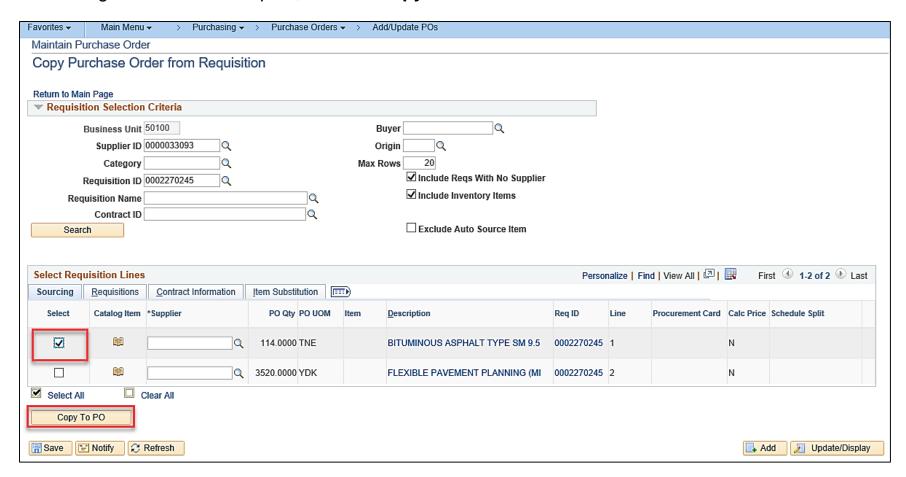

Enter search criteria as required in the Selection Criteria section of the page and click the **Search** button.

Click the **Search** button and the items matching search criteria appear in the list at the bottom of the page. Review the items and click the checkbox in the **Select** column for each item to be copied. Multiple items, such as multiple lines can be copied, if desired.

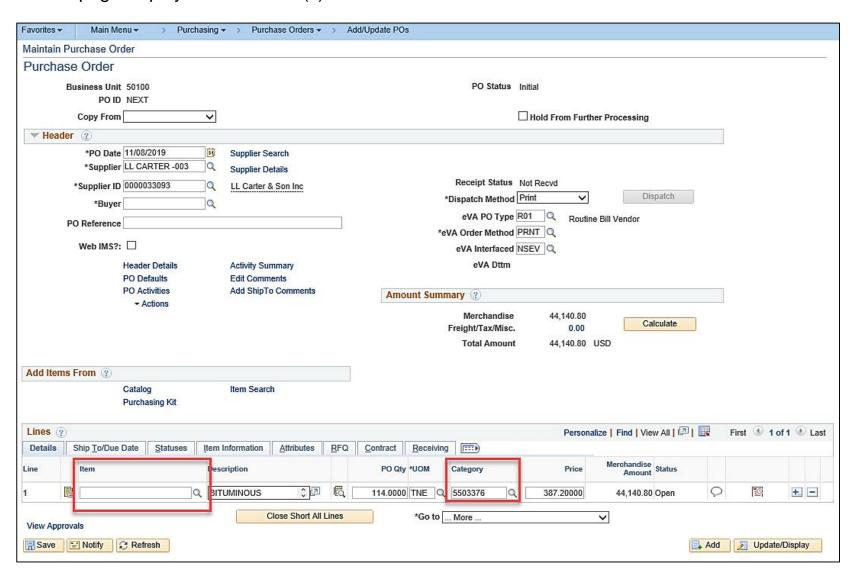

After selecting the items to be copied, click the **Copy to PO** button.

Creating Purchase Orders: Copy From (continued)

The **Purchase Order** page displays with the item(s) selected.

Creating Purchase Orders: Copy From (continued)

After copying the existing document information into the PO, some information may need to be added or changed, such as:

- Update the Buyer
- Date values which default and are not copied into the PO
- Shipping and freight information that defaulted from the copied document
- Schedule and distribution that defaulted from the copied document
- Enter the Quantity or Amount

Note: When copying from a contract, note that the contract selection displays on one tab. The contract number can be entered on the PO line to associate it to the contract.

After updating the fields as needed, click Save and a new PO is created. A PO ID is generated by Cardinal.

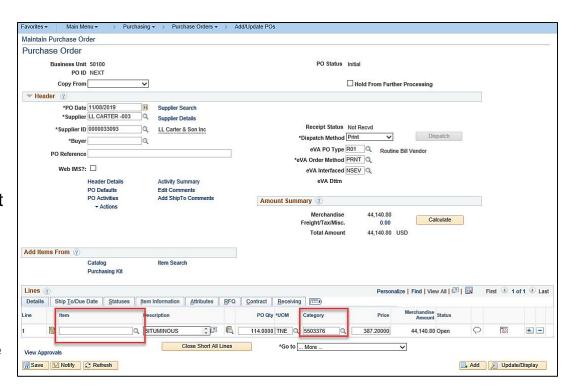

Creating Purchase Orders: Items

Once the **PO Header** section is complete, if needed, additional line items may be associated with the PO.

To Add New Lines

- The Lines section contains links that allow selection of items for the PO. Items can be selected or added by:
 - Key in, or look up, the National Institute of Governmental Purchasing (NIGP) Item number, i.e., Item. This is the most common method to select an Item. On each line, click on the magnifying glass next to the Item field. The items listed will be narrowed down to items related to the supplier you previously selected. The UOM and Description field values default from the item table.
 - Key in or look up the NIGP Category, i.e. Category.
 On each line, click on the magnifying glass next to the Category field. This method will not be limited to items related to the chosen supplier. Complete the UOM and Description fields. These fields become available for entry after the Category is selected.

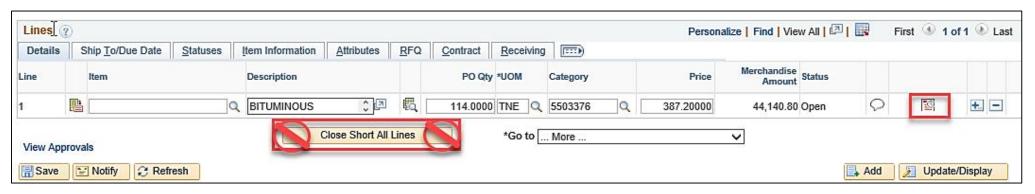

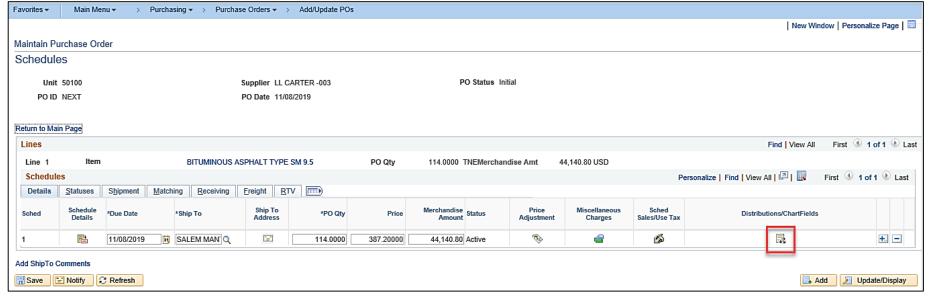

Creating Purchase Orders: Items (continued)

Close short processing is not used. Do not use the Close Short All Lines button.

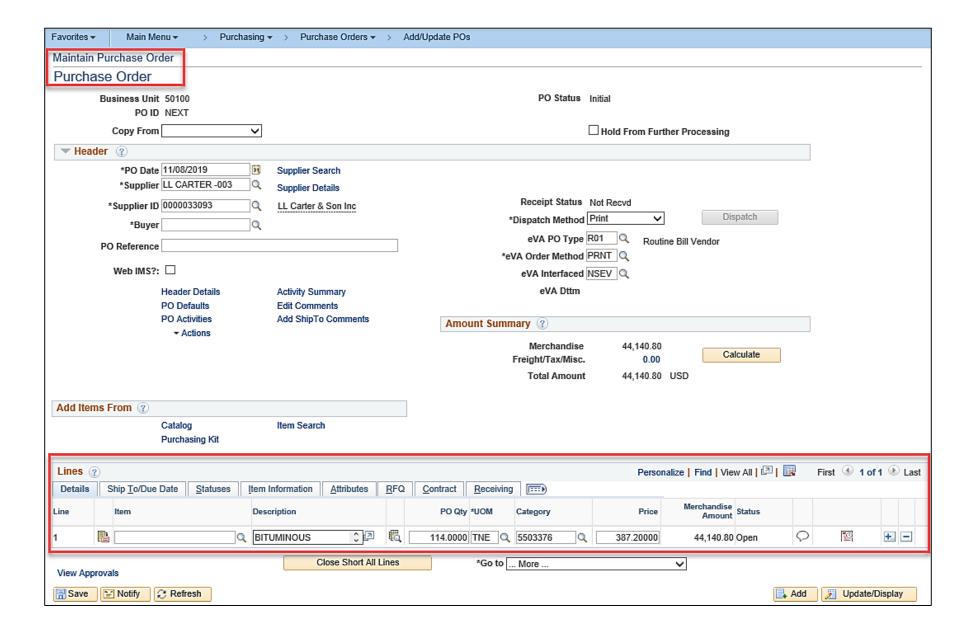

The accounting distribution can be accessed from the **Maintain Purchase Orders – Purchase Order** page by clicking the **Schedule** icon. From the **Schedules** page, click the **Distributions/ChartFields** icon.

Creating Purchase Orders - Items (continued)

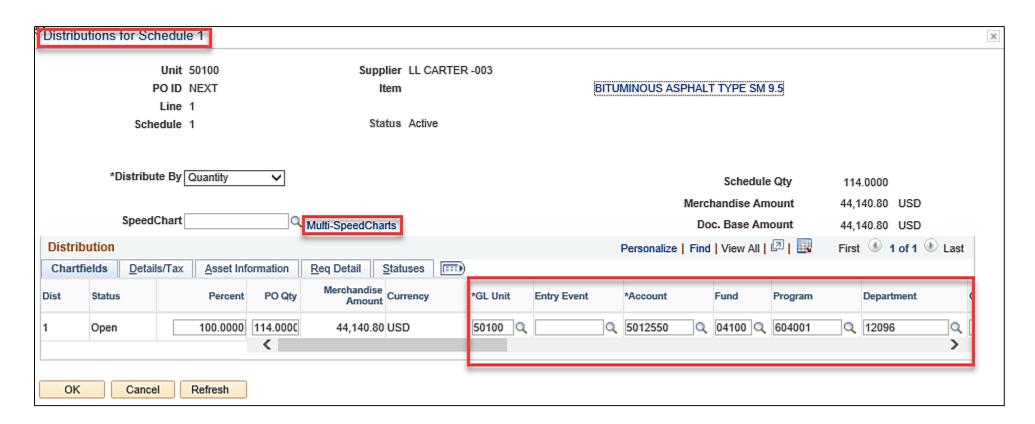

Creating Purchase Orders: Distributions

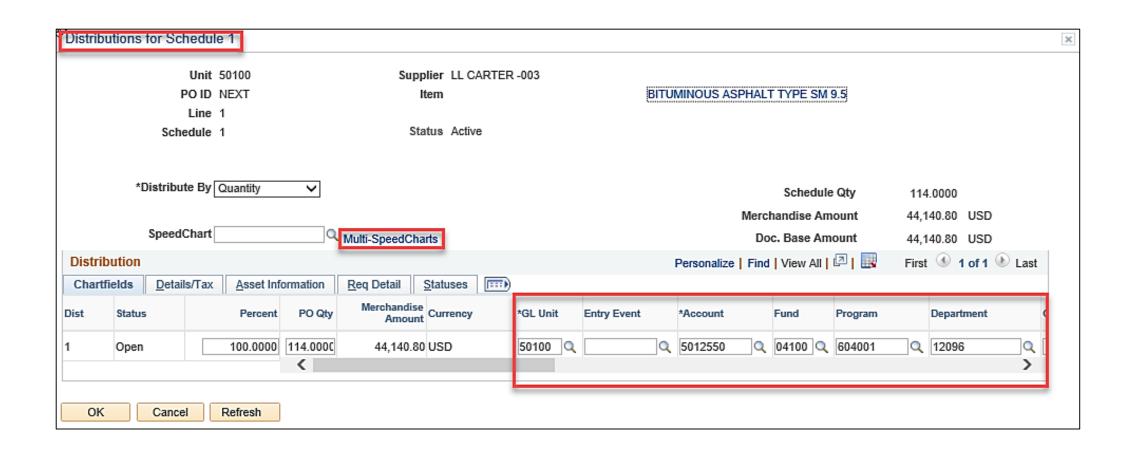

A schedule may have one or more accounting distributions. ChartField values determine what fund, account, department, etc. the schedule amount is charged to. If a PO line needs to use multiple SpeedCharts, click on the **Multi-SpeedCharts** link and split as necessary.

Do not split or add additional schedules for a PO line. There should be only one schedule per PO line.

Creating Purchase Orders: Distributions (continued)

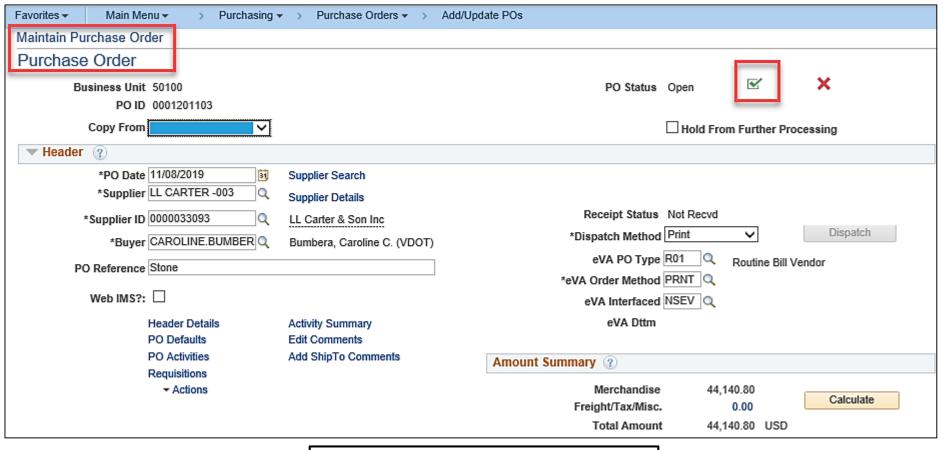

Creating Purchase Orders: Send for Approval

After updating the fields, return to the **Maintain Purchase Order – Purchase Order** page, click **Save**, and the PO is saved. A **PO ID** value will be generated. The final step is to send the PO forward for supervisor approval.

Click the PO Approval checkmark. The checkmark will disappear and the words Pend Appr will appear.

Simulation: Creating a Purchase Order/Ad-Hoc

You will now view a simulation that demonstrates how to Create a Purchase Order/Ad-Hoc.

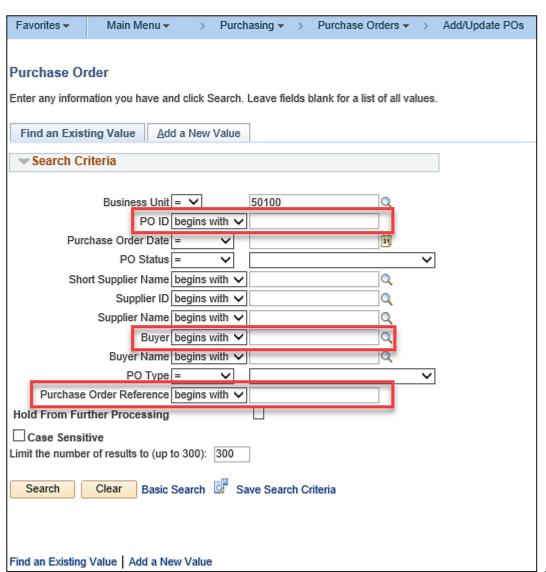

Managing eVA Purchase Orders

eVA Direct Orders (DOs) are loaded directly into Cardinal, where corresponding purchase orders are created. This allows for receiving and vouchering to occur.

The end user must update the PO with a valid Chart of Accounts and Buyer name.

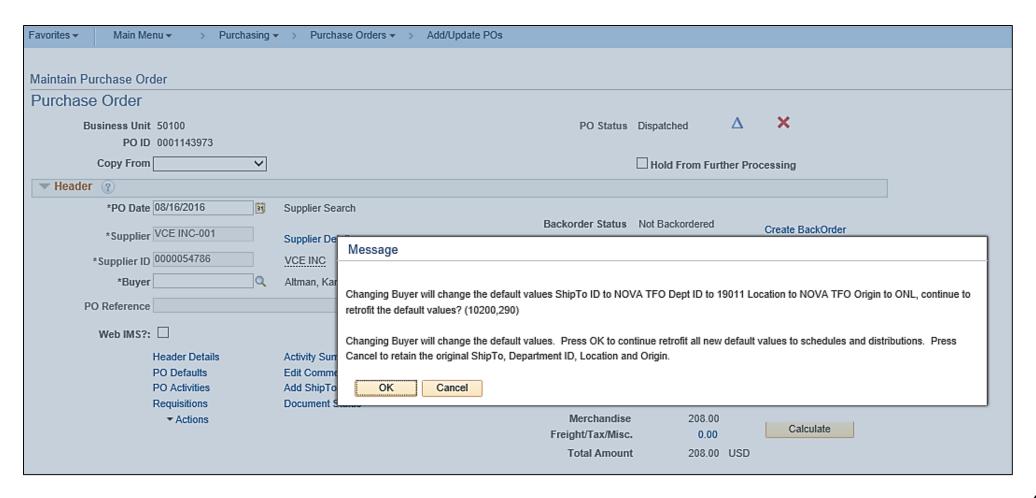

Important PO field information includes:

- PO ID When an eVA PO is loaded into Cardinal, it is assigned a PO ID.
- Purchase Order Reference The eVA PO number is loaded into the Purchase Order Reference field, which can be used to search for the PO.
- Buyer The Buyer name assigned to the PO is EVA BUYER when the PO is first loaded. The Buyer should update this name to their own name.

Changing the **Buyer** value prompts a message to appear, asking if the default **Ship To**, **Department ID**, **Location**, and **Origin** values should be changed. Click **Cancel** to maintain the prior default values.

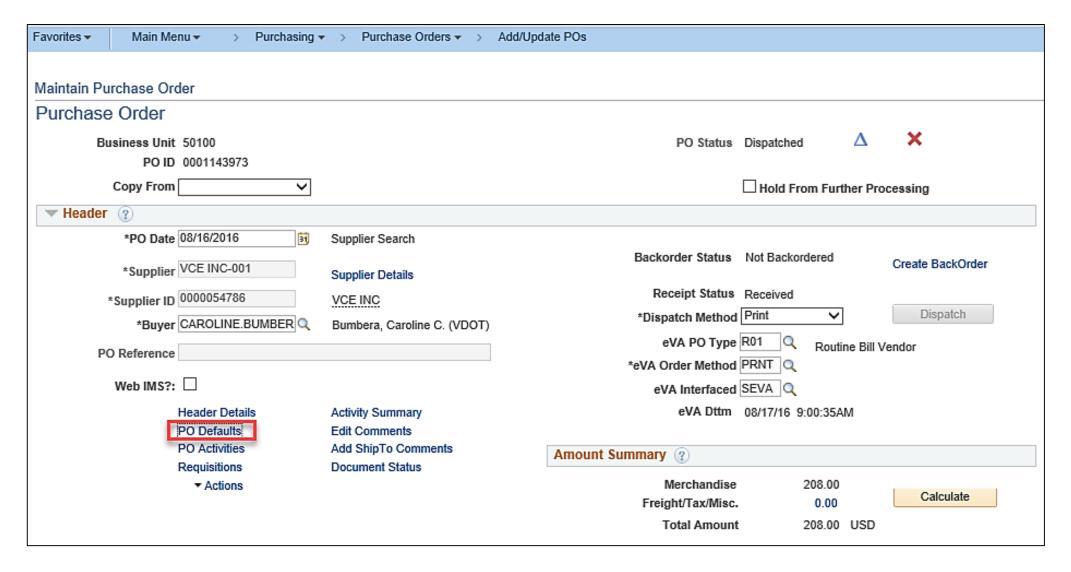

To complete the PO, the **Buyer** must enter the accounting distribution for each line on the PO. Click the **PO Defaults** link to enter the accounting distribution for all lines. Or, update the distributions for each PO line one at a time by clicking on the **Schedule** icon at the end of each PO line and then clicking on the **Distribution** icon at the end of the schedule line.

Managing eVA Purchase Orders: Distributions

On the Maintain Purchase Order - Retrofit field changes to "all" existing PO lines/schedules/distributions..... pop-up:

- Select the Apply to All Distribs checkbox next to all ChartField values to be applied to all distributions lines.
- If a value cannot be selected to Apply to All Distribs, be sure to Click the Apply checkbox to include it.
- Click OK.

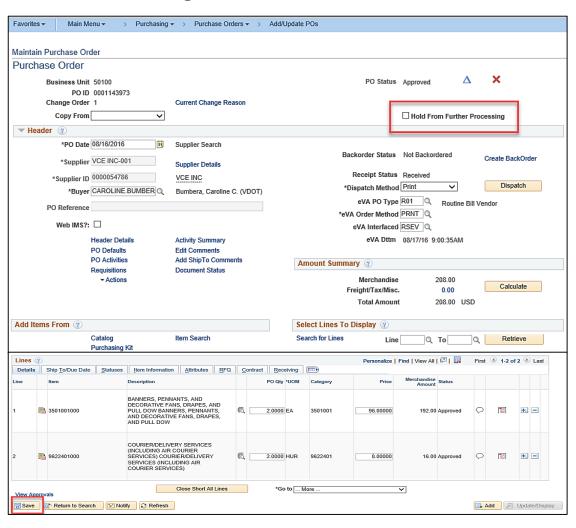

Managing eVA Purchase Orders: Distributions (continued)

Once the distribution values have been added:

- Deselect the Hold From Further Processing checkbox.
- Click Save.

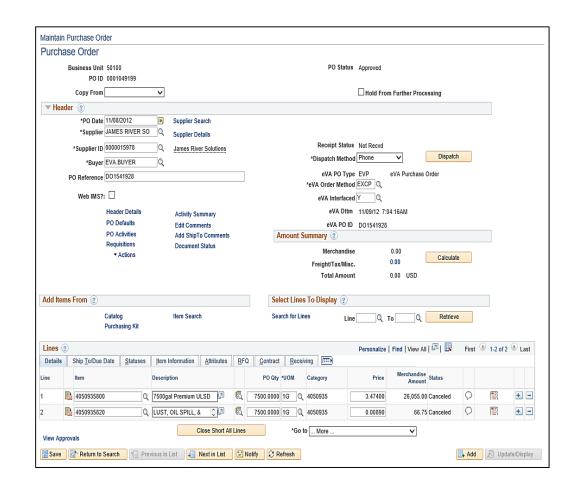

eVA Direct Orders (DOs) come into Cardinal with an **Approved** status. Material modifications (such as adding a line, changing quantities or prices, etc.) made to an eVA PO are not done in Cardinal.

When changes are required, they must be performed on the PO in eVA, and then the PO change order will be interfaced back to Cardinal.

A dispatched PO flows to eVA for reporting purposes. If the supplier is set up in eVA as **URL** dispatch, the PO is sent electronically to the supplier. If not, the Buyer should print the PO and send it to the supplier.

Dispatching POs is discussed later in the course.

Submitting Purchase Orders for Approval

POs created without a requisition require an approval.

POs created from a requisition or awarded from a Strategic Sourcing event are built with an approved status, since they have already been approved.

POs interfaced from eVA are loaded with an approved status, since the POs were created in eVA and have already been approved.

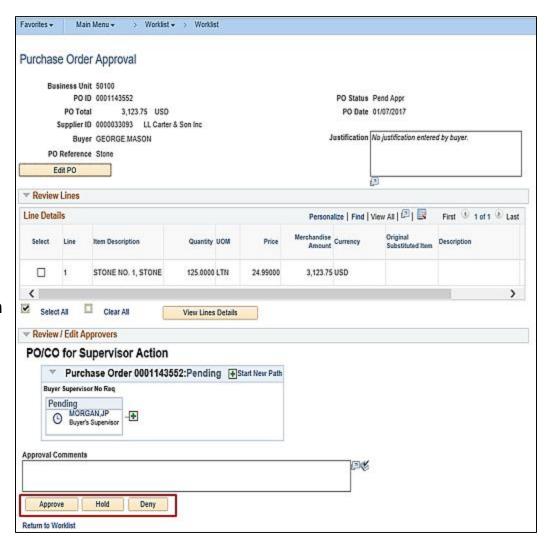

Submitting Purchase Orders for Approval (continued)

Email notifications, with links to worklists items, are sent to Supervisors as a notification that POs require approval.

Supervisors are also notified via their worklists in Cardinal. From their worklists, Supervisors can click the link next to the PO that requires approval. This link takes them to the Purchase Order Approval page, where they can Approve, Deny, or Hold the PO. The Supervisor clicks the desired button at the bottom of the page to approve, hold, or deny the PO. If the Supervisor denies the PO, it is routed back to the Buyer to be updated or cancelled.

Cardinal sends a reminder email if the PO is not worked within 24 hours. POs must be approved within 48 hours, or the PO is routed to the Supervisor's Supervisor.

For more detailed information about PO approvals, see the course entitled **501 PR343: Procurement Approvals** located on the Cardinal website in **Course Materials** under **Learning**.

Dispatching and Printing Purchase Orders

Approved POs must be dispatched. A dispatched PO sets flags so the PO can be received and vouchered against. Dispatching a PO does not send the PO to the supplier.

Dispatching the PO involves either the Buyer running the PO Dispatch process from the **Maintain Purchase Order** - **Purchase Order** page or letting the batch process automatically dispatch the PO.

A dispatched PO flows to eVA for reporting purposes. If the supplier is set up in eVA as **URL** dispatch, the PO is sent electronically to the supplier. If not, the Buyer should print the PO and send it to the supplier.

This process involves the following steps:

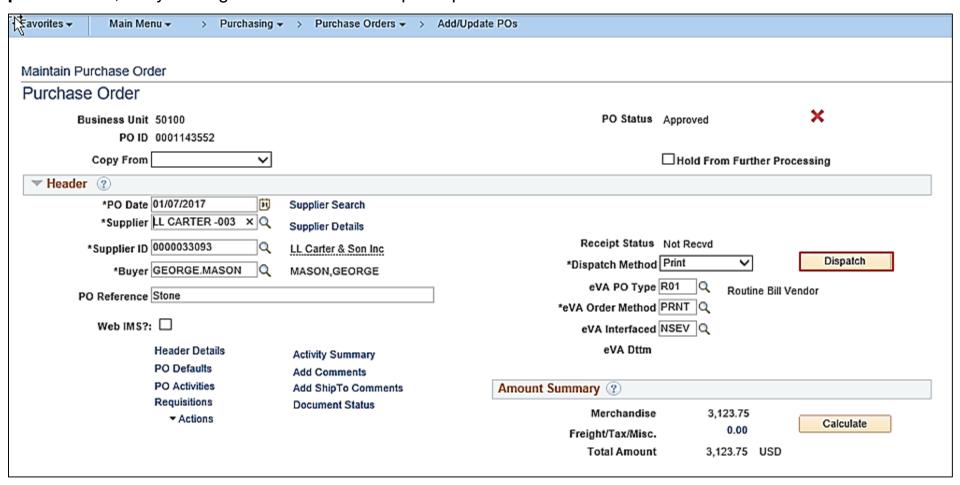

- PO Dispatch is a batch process that runs throughout the day.
- The status of the PO changes to **Dispatched**.
- The Buyer can print out the PO, or if the eVA order method is **URL**, the PO is sent to the supplier by eVA.

All POs are interfaced to eVA, except POs with eVA order method of **Exception** and originating in eVA.

Dispatching and Printing Purchase Orders (continued)

A PO maybe dispatched by either going to the **Maintain Purchase Order** - **Purchase Order** page and clicking on the **Dispatch** button, or by waiting for the automatic dispatch process to be run.

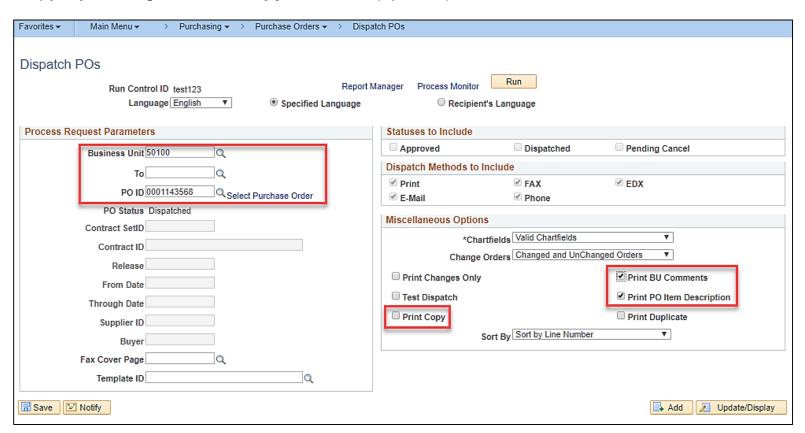

Dispatching and Printing Purchase Orders (continued)

A dispatched printed PO has a place for the Buyer's signature. Navigate to the Dispatch POs page using the following path:

Main Menu > Purchasing > Purchase Orders > Dispatch POs

- Enter the Business Unit and PO ID.
- Check the Print BU Comments and Print PO Item Description checkbox.
- Print another copy, by clicking the Print Copy checkbox (optional).
- Click Run.

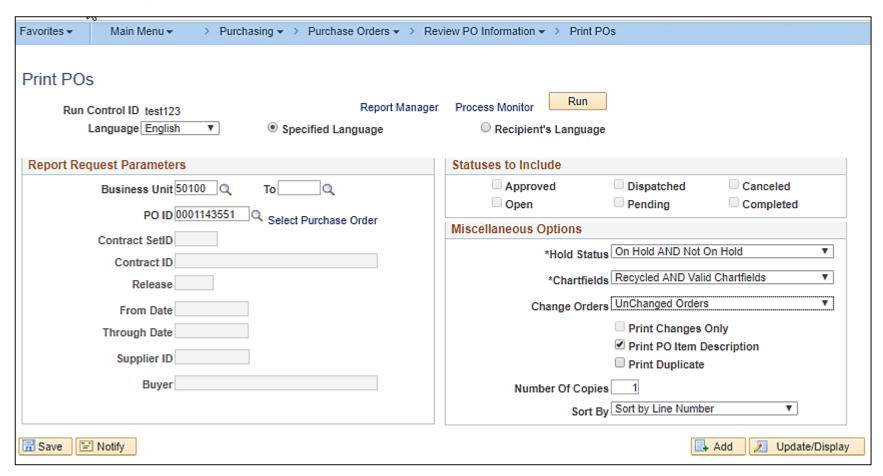

Dispatching and Printing Purchase Orders (continued)

The PO may be printed as a PDF version, as a copy only. This printed version does not have a **Buyer** signature box.

Navigate to the **Print POs** page using the following path:

Main Menu > Purchasing > Purchase Orders > Review PO Information > Print POs

Lesson 2: Checkpoint

Now is your opportunity to check your understanding of the course material. Read the question and make note of your answer below.

1. Materials changes to POs interfaced from eVA into Cardinal are completed in eVA.

True or False

2. Once the creation of the PO is started, you can identify the following and associate to the PO.

- a) Items
- b) Suppliers
- c) Pricing
- d) Comments

3. Match the correct answer to each question:

- a) POs created without a requisition _____
- b) POs interfaced from eVA _____
- c) POs created by the purchase order build process from a requisition_____

2

Processing Purchase Orders

In this lesson, you learned:

- You can create a PO without a requisition by awarding a Strategic Sourcing event or by copying a requisition, purchase order, or contract.
- POs that you create without a requisition require approval.
- POs created by the PO build process from a requisition are built with an Approved status.

3

Maintain and Modify Purchase Orders (Change Orders)

This lesson covers the following topics:

- Create Change Orders for Purchase Order
- Approve Change Orders
- Purchase Order Modify Accounting Distribution
- Change Order Helpful Hints

Create Change Orders for a PO

Except if interfaced from eVA or SiteManager, a change order is created manually when a dispatched PO requires modifications that affect any of the following:

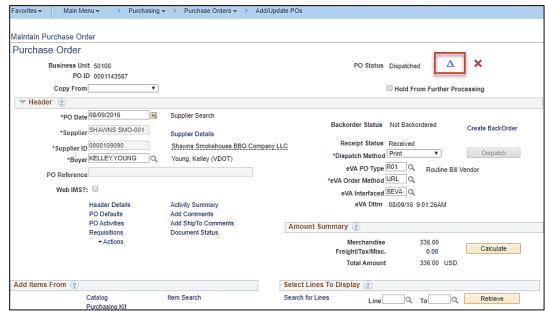

- PO quantities
- Dollar values
- Shipping/billing addresses
- Add/cancel line items

In addition, since suppliers and agencies are charged eVA fees based on the values of a PO, all PO's must be reconciled to match the received and paid amounts. If an update is needed based on the reconciliation, it also creates a change order.

To make a change to a PO that has been dispatched, i.e., change order, use the **Add/Update POs** pages using the following path:

Main Menu > Purchasing > Purchase Orders > Add/Update Pos

Using the **Find Existing** tab, search for the PO you wish to change.

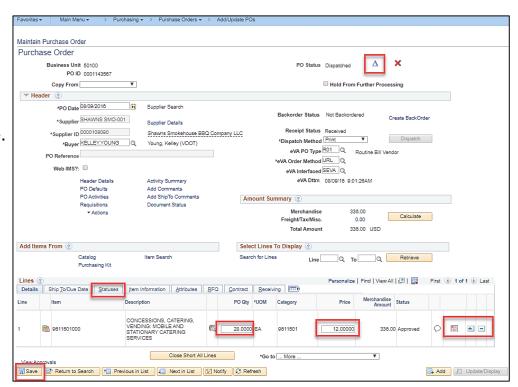

There are several ways to create a change order from the **Maintain Purchase Order – Purchase Order** page:

- Click the blue triangle in the top right corner to change header information.
- Add a line/cancel a line using the +/- icons to the right of the line.
- Change the quantity or price on a PO line or PO schedule.
- Click the blue triangle on the Lines Statuses tab to change line information.
- Click the blue triangle on the Maintain Purchase Order -Schedules page to make changes to a line schedule.
 Navigate to this page by clicking on the Schedule icon.

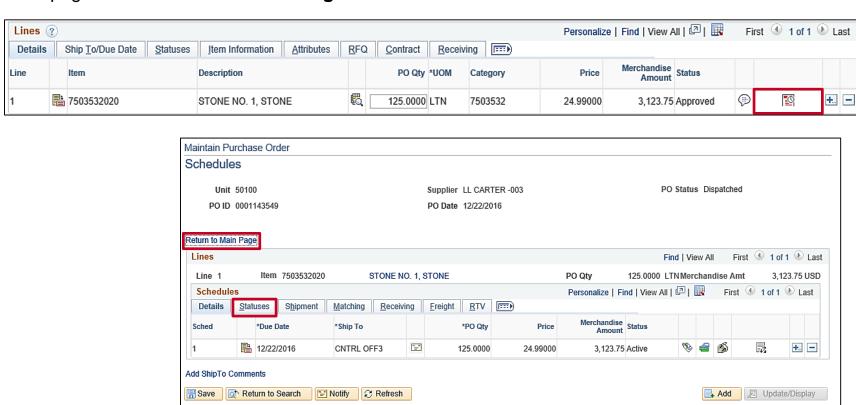

Do not change the price on a line that has been received against.

Once changes are made and **Saved**, the change order is ready for dispatch, or will be submitted for approval.

From the **Maintain Purchase Order – Purchase Order** page, click on the **Schedule** icon to jump to the **Maintain Purchase Order - Schedules** page. To modify the schedule **Due Date** or **Ship To** fields, go to the **Statuses** tab in the **Schedules** section of the page and click on the **Blue Triangle** icon.

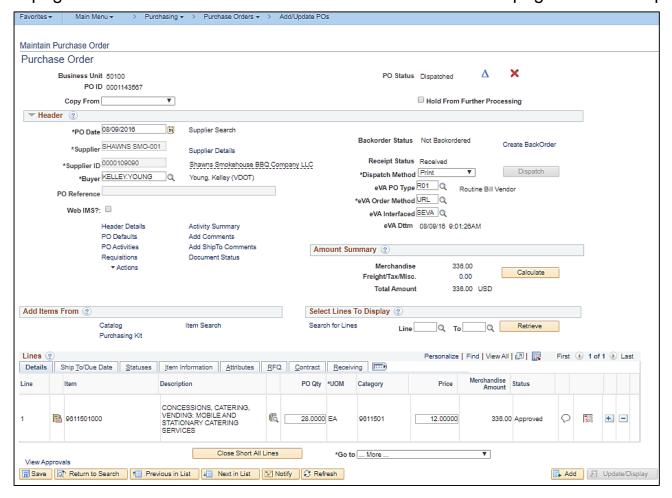

When updates have been completed, click **Return to Main Page** to return to the prior page.

From the **Maintain Purchase Order - Purchase Order** page, the quantity of a PO can be increased or decreased:

Click on the Change Order icon, i.e., the blue triangle, in the top right hand corner of the Maintain Purchase Order - Purchase Order page. The Maintain Purchase Order - Purchase Order page remains displayed and changes can be

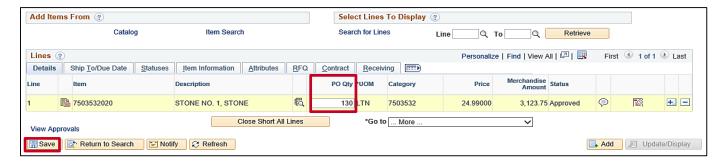

made.

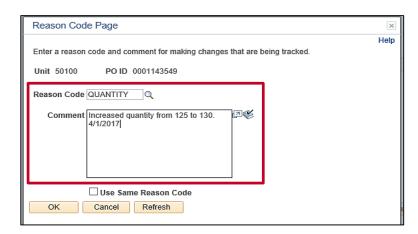

On the Maintain Purchase Order - Purchase Order page:

- Make the needed changes to the existing line(s). In this example the PO Qty is increased from 125 to 130.
- Click Save.

The **Change Reason** pop-up window displays:

- Enter a Reason Code and Comment to explain the change(s).
- Click OK.

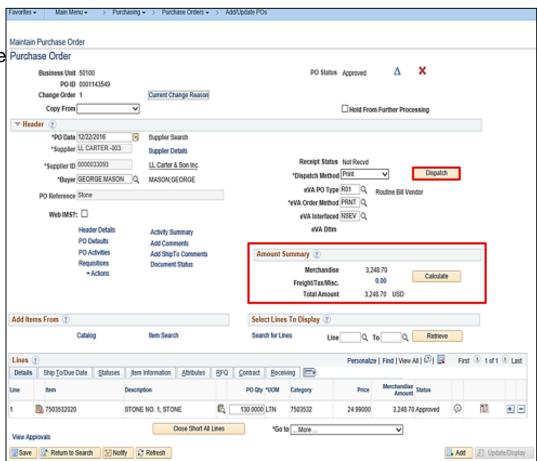

Upon **Save**, a **Change Order** number displays, fields are updated, and amounts recalculated.

In the example below, the PO value did not increase by more than 25% and therefore its status remains **Approved**.

See the section in this lesson entitled Change Order Helpful Hints for additional details on change order approval processing.

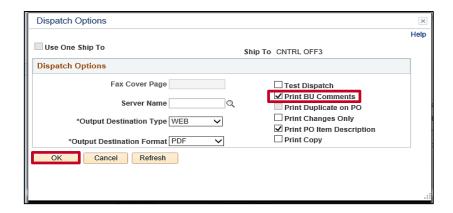

- The Dispatch Method defaults to Print.
- Click on the **Dispatch** button.

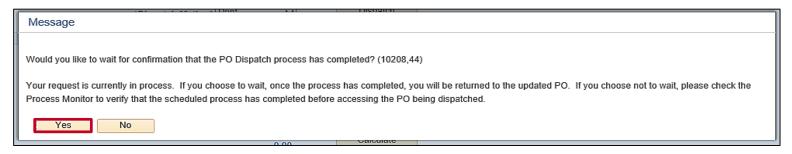

The **Dispatch Options** pop-up window displays:

- Check Print BU Comments to display line and header comments, to include eVA terms and conditions.
- Click OK.

A pop-up message regarding waiting for confirmation will be displayed:

 Click Yes. Once the PO Dispatch process has completed, the Maintain Purchase Order – Purchase Order page will display.

On the Maintain Purchase Order - Purchase Order page, the PO Status has been updated to Dispatched.

A dispatched PO flows to eVA for reporting purposes. If the supplier is set up in eVA as URL dispatch, the PO is sent electronically to the supplier. If not, the Buyer should print the PO and send it to the supplier.

Create Change Orders for a PO: Cancel PO

Cancel PO:

To cancel a PO, click on the red X on the Maintain Purchase Order – Purchase Order page. This begins the cancellation process, which includes changing the lines to a Cancel status and changing the header to a Pending Cancel status

In order to cancel the PO:

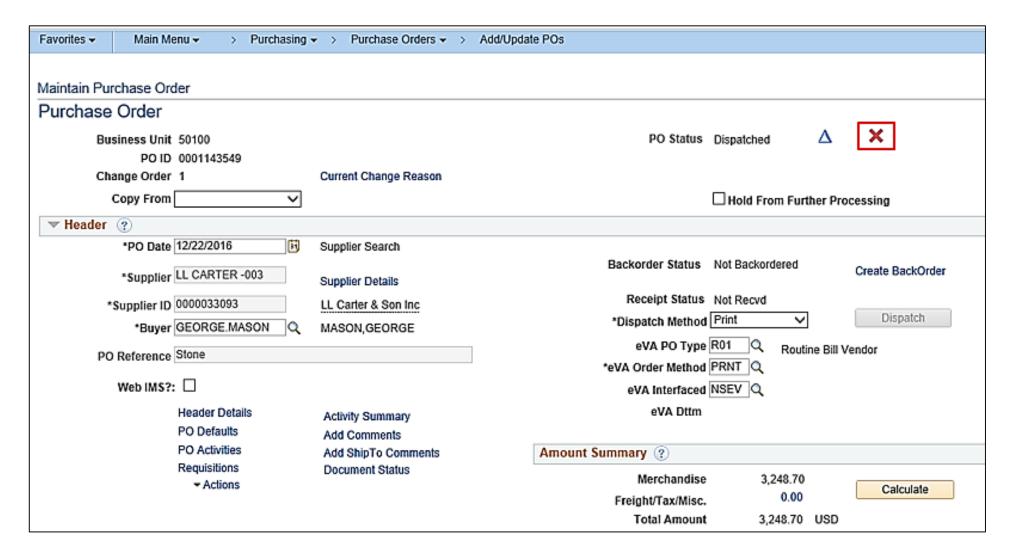

- The PO cannot be on hold
- There cannot be any matched PO line schedules
- There cannot be any receipts against the PO
- There cannot be any open vouchers against the PO

When canceling a PO from a Strategic Sourcing event, Cardinal asks if the quantity should be moved back into the Sourcing event. If yes, the quantity is put back to the award and can either be re-awarded to another bidder or manually close it.

Once cancelled, the Buyer or a batch process will dispatch the PO to complete the cancellation process. This step is required to officially cancel the PO.

Create Change Orders for a PO: Cancel PO (continued)

Create Change Orders for a PO: Cancel PO Line

Canceling the PO Line is available if the PO status is **Dispatched**. If a dispatched line is cancelled, a change order is created. Canceling is also available when the PO status is **Approved**, but only if the PO was previously dispatched and subsequently changed and approved.

From the **Maintain Purchase Order – Purchase Order** page, navigate to the **Details for Line** page using the **Line Details** icon. Click the red **X** to cancel the PO Line. The system cancels the PO line.

Create Change Orders for a PO: Cancel PO Schedule

Canceling the PO Schedule is available if the PO status is **Dispatched**. If a dispatched schedule is cancelled, a change order is created. Canceling is also available when the PO status is **Approved**, but only if the PO was previously dispatched and subsequently changed and approved.

From the **Maintain Purchase Order – Purchase Order** page, navigate to the **Schedules** page using the **Schedule** icon. Click on the **Schedule Details** icon to open the **Details for Schedule** pop-up window. Click the red **X** to cancel the purchase order schedule. The system cancels the PO schedule.

Approve Change Orders

After a change order is created, it should be approved (if necessary) and dispatched to the supplier. The change order dispatch process is the same as with the original PO. Remember to check the **Approval** check box to send the change order for approval.

POs that have change orders attached to them go through a specific approval routing that depends on the difference between the originally approved PO amount, the change order amount, or if a line was added. If a new line is added to a PO, it will require the Buyer's Supervisor approval at a minimum. Any change to a PO that affects the **Quantity**, **Price**, or **Ship To** fields may require approval.

The change order appears on the approver's work list and an email is sent to the approver with a link to approve the change order. The approval process for change orders is the same as for POs.

After approval, the change order must be dispatched and any changes made to the PO are in bold print on the printed change order.

For more detailed information about change order approval requirements, see the course entitled **501 PR343: Procurement Approvals** located on the Cardinal website in **Course Materials** under **Learning**.

Change Order Approvals Summary:

- Adding a line to a PO will require Supervisor approval.
- Changes < 25% do not need Supervisor approval.
- Changes > 25% will escalate to the Supervisor for approval.
- Changes > 25% or \$50,000 (whichever is greater) to PO with original value > \$50,000 will escalate to the ASD Director for Approval

Helpful Hints:

- The following will automatically cancel an eVA order and create a new eVA order:
 - Change to the Bill To Address
 - Change to a different address location for the same supplier
- Never change the unit price on an item that has already been received and vouchered. Close out the line amount to what
 has been matched and insert a new line for the remaining items at a changed price.

Approve Change Orders (continued)

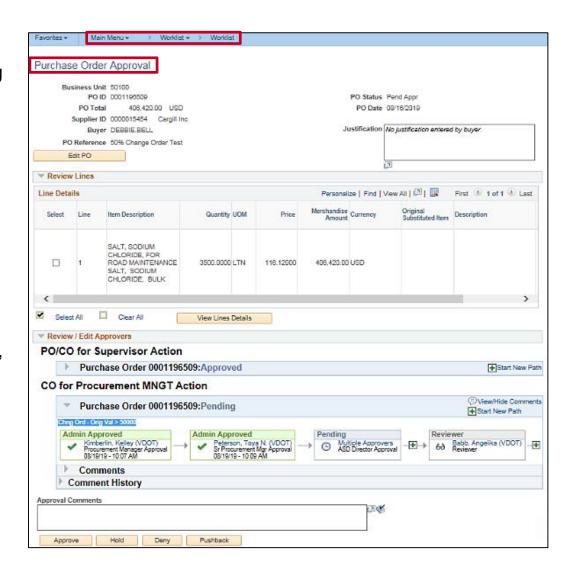

Change orders are approved on the **Purchase Order Approval** page. Access this page through the worklist using the hyperlink at the bottom of every page.

Navigate to the **Purchase Order Approval** page using the following path:

Main Menu > Worklist > Worklist

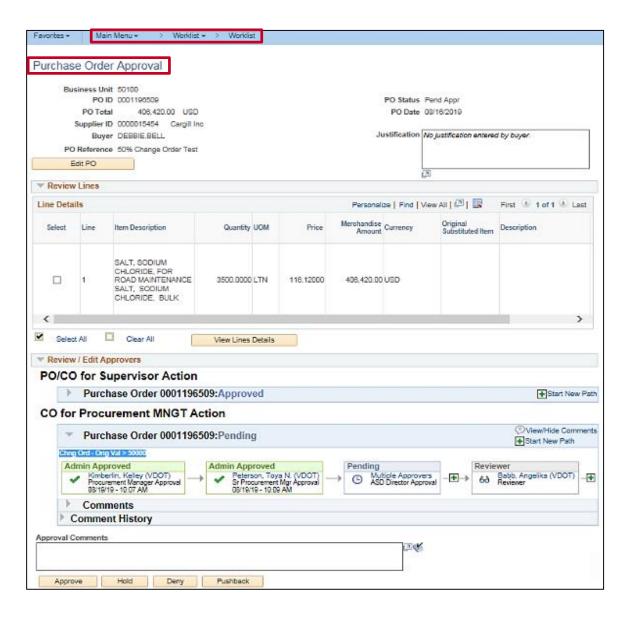

Click the **Purchase Order** hyperlink to access the change order to be approved.

For more detailed information about change order approvals, see the course entitled **501 PR343: Procurement Approvals** located on the Cardinal website in **Course Materials** under **Learning**.

Approve Change Orders (continued)

Simulation: Creating a Purchase Order/Ad-Hoc

You will now view a simulation that demonstrates how to Create a Purchase Order/Ad-Hoc.

Purchase Order: Modify Accounting Distribution

Accounting entries may be modified for PO lines that have not yet been received or matched and vouchered in Accounts Payable. Changing accounting distributions does not trigger the change order approval process.

There are instances when a PO has been partially received/vouchered and, due to fiscal changes in budgets or project coding, it is necessary to change/edit the chart of accounts distribution for the remaining balance.

For more detailed information about making these changes, see the job aid entitled **501 PR344: Update ChartFields on Partially Vouchered Purchase Orders** located on the Cardinal website in **Job Aids** under **Learning**.

Modify Accounting Distributions: Single Line

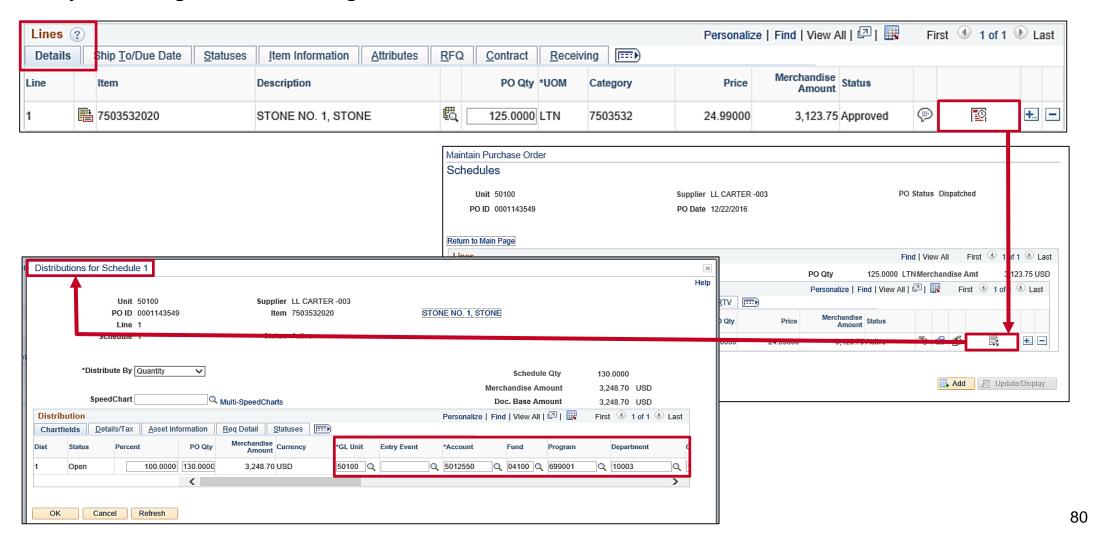

To modify the accounting distribution for a single line, navigate to this page using the following path:

Purchasing > Purchase Orders > Add/Update Pos

- Select the Schedule icon from the Details tab to open the Schedules page.
- Select the **Distributions/ChartFields** icon on the line to be changed.
- Enter the new ChartField values.
- Click **OK** to save.

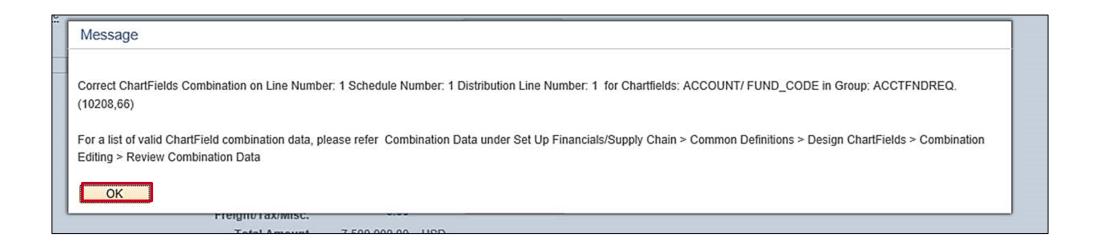

Modify Accounting Distributions: Single Line

In the event a pop-up message is displayed, use the information found within the message to resolve the error. In the example below, the **Account** is required.

For more detailed information about combination edits, see the job aid entitled **501 GL332**: **Combination Edits Review Tools** located on the Cardinal website in **Job Aids** under **Learning**.

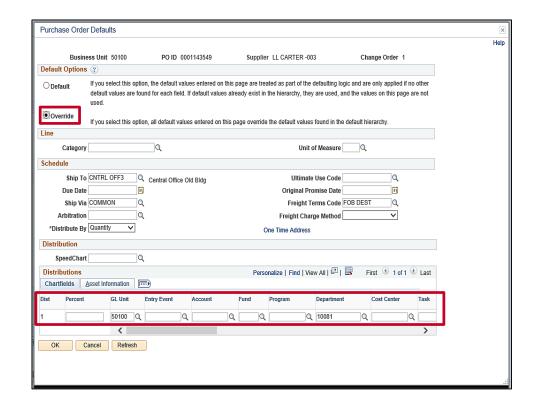

Accounting entries may be modified for PO lines that have not yet been received or matched and vouchered in Accounts Payable.

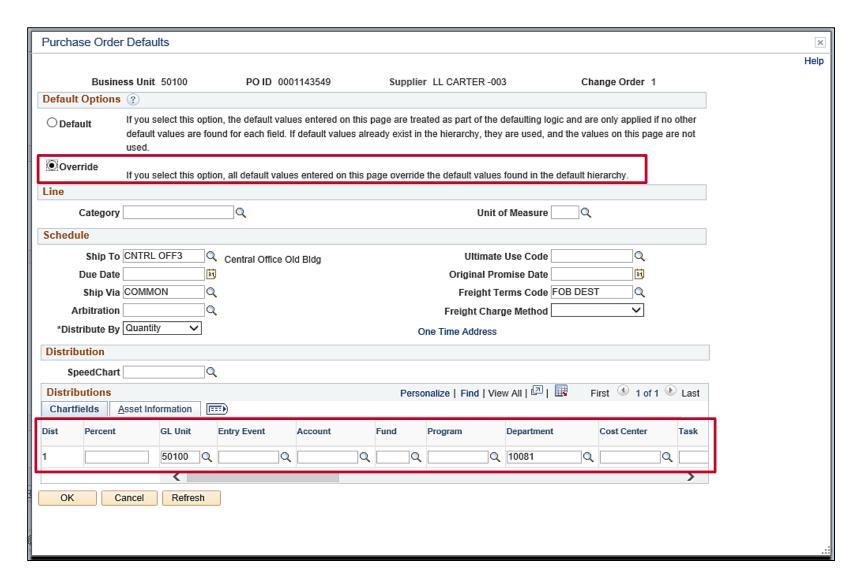

Changing accounting distributions does not trigger the change order approval process.

Access the accounting distribution lines from the **Maintain Purchase Order – Purchase Order** pop-up window by clicking on the **PO Defaults** hyperlink.

New values entered on this page will override default values. Only fields with new values will be updated.

Lesson 3: Checkpoint

Now is your opportunity to check your understanding of the course material. Read the question and make note of your answer below.

1. Modifying the accounting distribution does not trigger change order approval.

True or False

- 2. When you need to change a PO that has already been _____, you create a change order.
 - a) Started
 - b) Dispatched
 - c) Approved
 - d) Closed

3

Maintain and Modify Purchase Orders (Change Orders)

In this lesson, you learned:

- To modify a PO that has already been dispatched, you need to create a change order.
- You can create a change order (modify a purchase order) using the Add/Update POs page.
- To cancel a PO Line, navigate to the Details for Line page for that PO line you want to cancel and click on the Red X. This cancels the line only.
- If the chart of accounts distribution is not valid, an error message will be displayed.

4

Reconciling/Close the PO

This lesson covers the following topics:

Reconcile/Close a PO

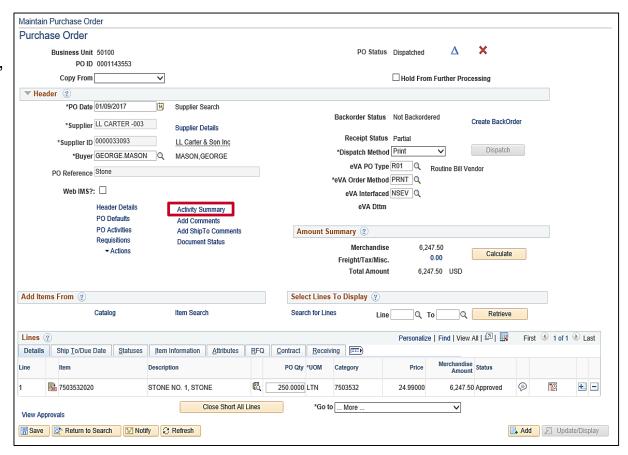

Once a PO is complete, if the amount/quantity received differs from what was ordered, received, and ultimately invoiced by the supplier, the quantities, or amounts must be decreased or increased, to match the actual amount/quantity received.

To reconcile/close a PO navigate using the following path:

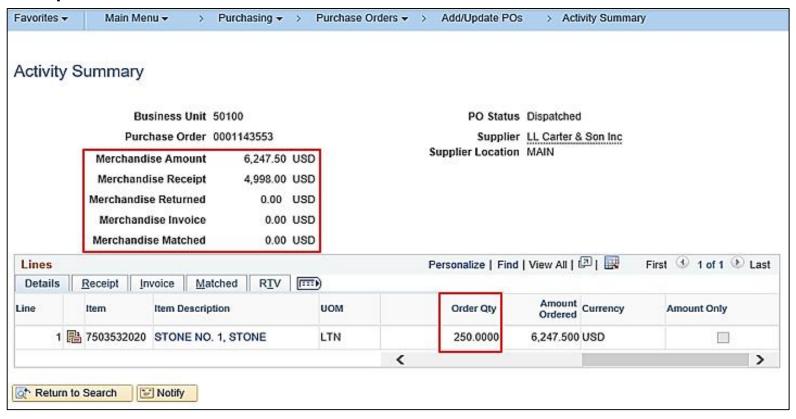

Main Menu > Purchasing > Purchase Orders > Add/Update POs

- Select the Find an Existing Value tab.
- Enter the PO ID # to be closed out.
- Click Search button. The Maintain Purchase
 Order Purchase Order page displays.
- The details of the PO selected are displayed.
- Click on the Activity Summary hyperlink. The Activity Summary page will display.

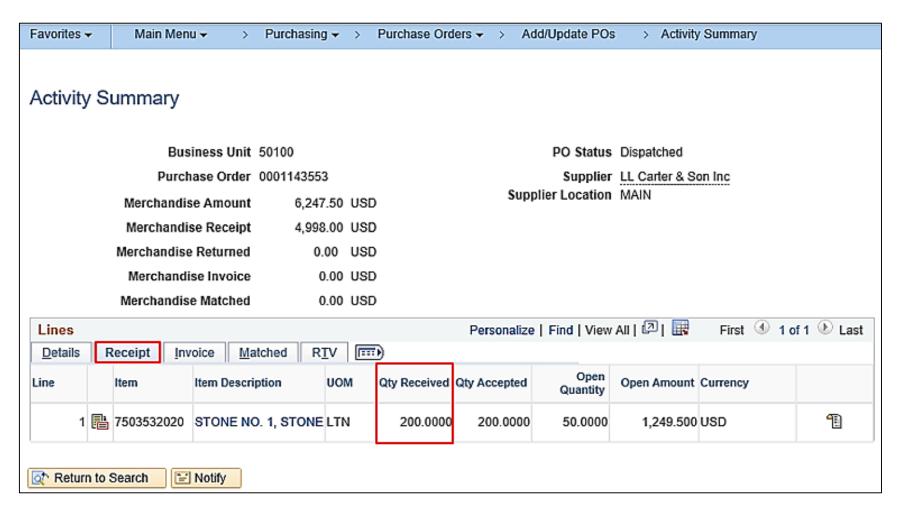

- The Activity Summary header displays the Merchandise Amount, Merchandise Receipt, Merchandise Returned,
 Merchandise Invoice, and Merchandise Matched values.
- The Details tab displays the Order Qty. Scroll to the right and make note of the quantity ordered.
- Click on the Receipt tab.

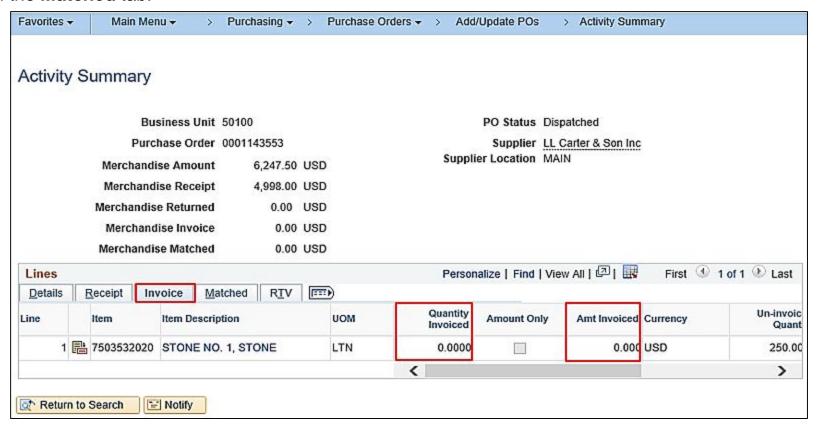

- The Receipt tab displays the Qty Received. Make note of the quantity received.
- Click on the Invoice tab.

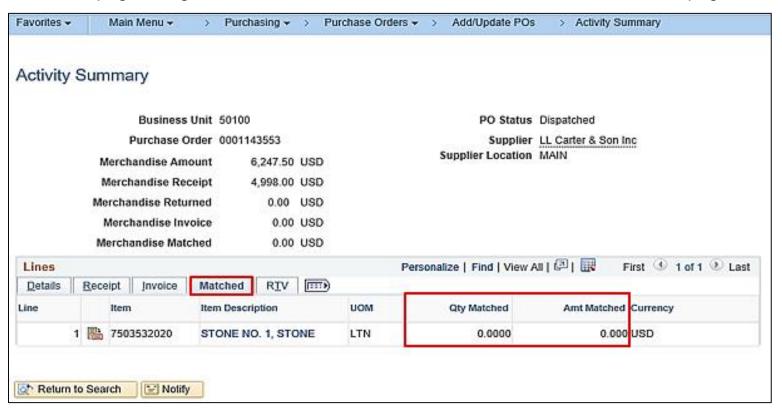

- The Invoice tab displays the Quantity Invoiced and Amt Invoiced from the supplier. \
- For each line compare:
 - the Order Qty on the Details tab with the Qty Received on the Receipt tab
 - along with the Quantity Invoiced on the Invoice tab.
- Click on the Matched tab.

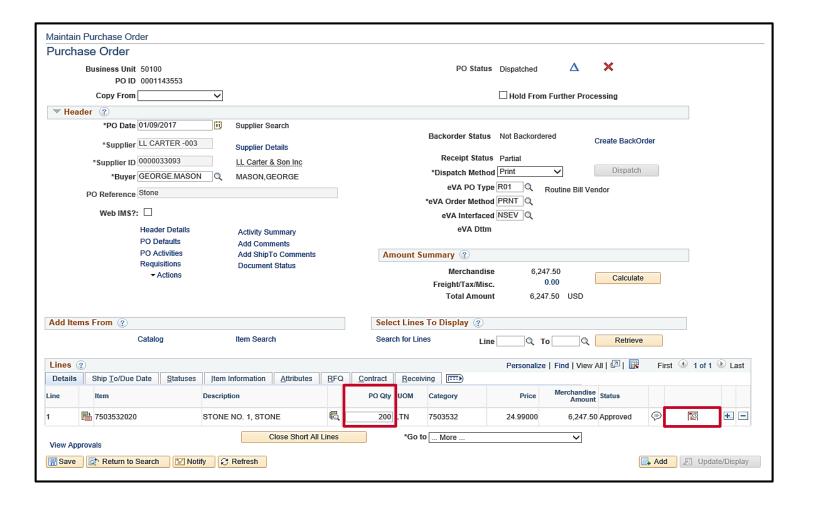

- The Matched tab displays the Qty Matched and Amt Matched as vouchered/paid from the Accounts Payable module.
 Matching is an automated process that is handled within the Accounts Payable module. The matching process is used to compare vouchers. i.e., supplier invoices, with purchase orders, and receiving documents. In this example matching has not yet occurred therefore the values remain at zero.
- Close or minimize the page and go back to the Maintain Purchase Order Purchase Order page.

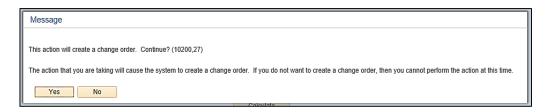

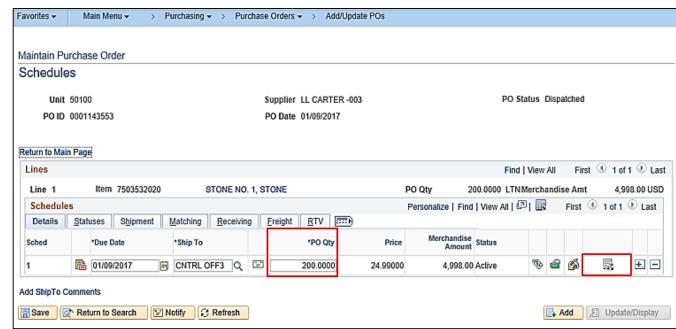

- For each line, enter the Qty Received from the Receipt tab on the Activity Summary in the PO Qty field.
- Click on the Schedule icon.

- A change order confirmation message is displayed. This message is displayed when the purchase order is being changed but the blue triangle was not used to create the change order.
- Click Yes. The Maintain Purchase Order –
 Schedules page will display.
- The Schedules are displayed.
- Verify that the PO Qty field on each schedule matches the changes just made on the on the Purchase Order page to the PO Qty field.
- Click the **Distribution** icon on the first line.
 The **Maintain Purchase Order Distributions for Schedule X** pop-up window is displayed.
 - Click the **Distribution** icon for each line.

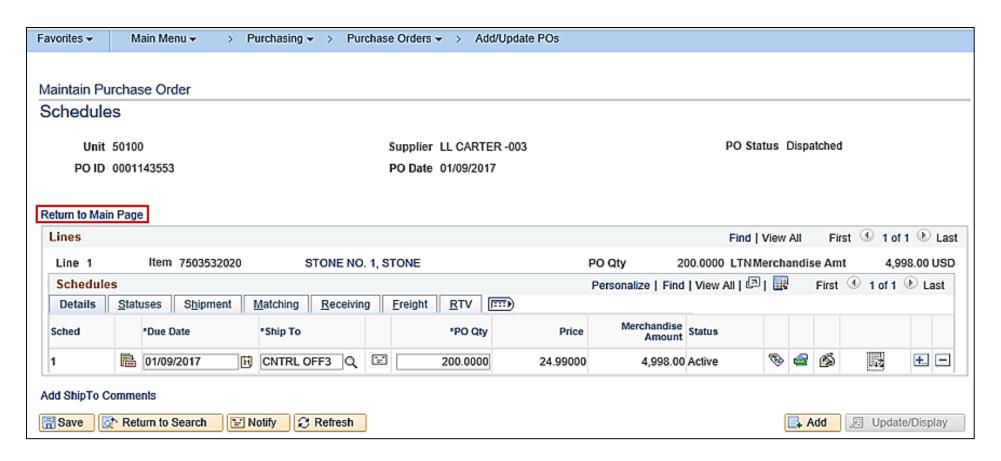

- Verify that the PO Qty field on each distribution line matches the changes made to the PO Qty field on the on the Schedules page and the Purchase Order page.
- Click OK. The Maintain Purchase Order Schedules page will display.

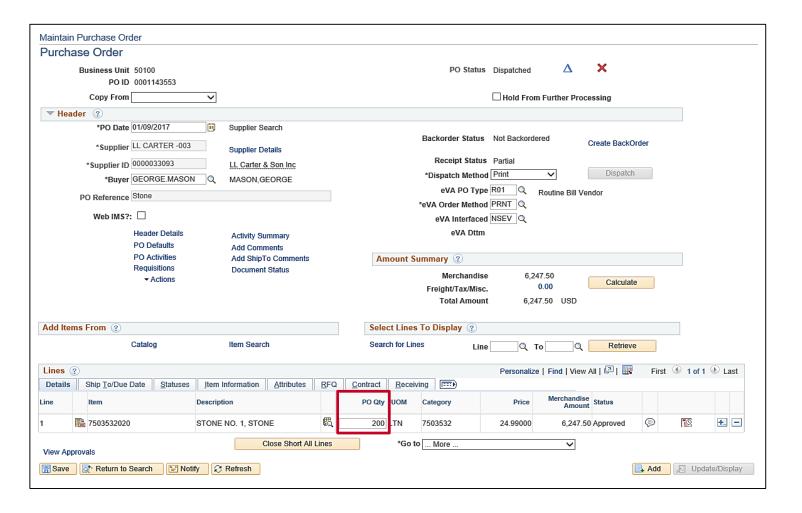

• Click on the **Return to Main Page** hyperlink. The **Maintain Purchase Order – Purchase Order** page will display.

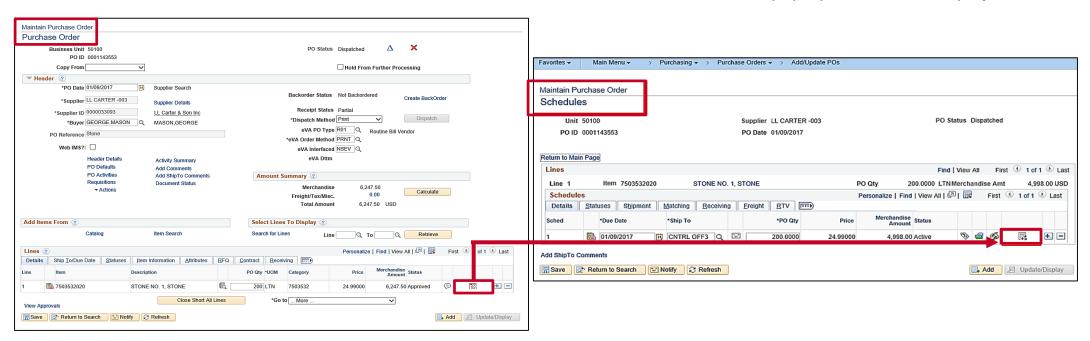

Confirm that the PO Qty field for each line on the Details tab of the Purchase Order page still matches the changes
made to the PO Qty field on the on the Schedules page and the Distributions for Schedule X page.

Once the updates to the PO have been made it is important to ensure that the sum of accounting distribution matches the changes to the schedules. From the **Maintain Purchase Order – Purchase Order** page:

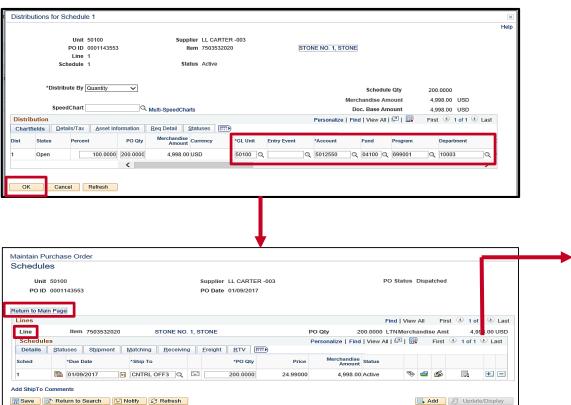

- Click on the **Details** tab.
- Click on the **Schedule** icon for the line to be reviewed. The **Schedules** page for the line will display. Review each line's accounting distribution.
- From the Details tab, click on the Distribution icon. The Distributions for Schedule X pop-up window will display.

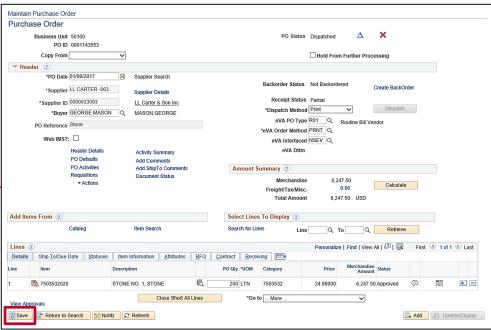

The **Distributions for Schedule X** pop-up window will display:

- Verify or update the sum of the accounting distribution(s) to match the Line Schedule.
- Click OK. The Schedules page will display.

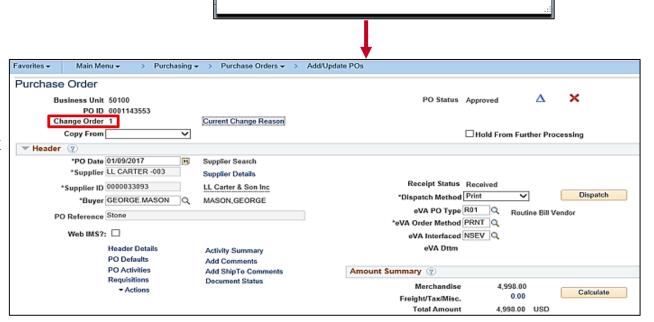

- Click on the Return to Main Page hyperlink. The Purchase Order page will display.
- Click Save. The Change Reason page will display.

- Enter/update the **Reason Code** and **Comment**.
- Click OK.
- The Maintain Purchase Order Purchase Order page will display.

- The reconciliation changes have been saved.
- The **Change Order** field value is updated to **1**.
- Click on the PO Submit for Approval checkbox (the green checkmark) which is next to the **PO** Status field.

Enter a reason code and comment for making changes that are being tracked.

PO ID 0001143553

Comment Reduced quantity to match received amounts. 4/1/2017

> Use Same Reason Code Refresh

Cancel

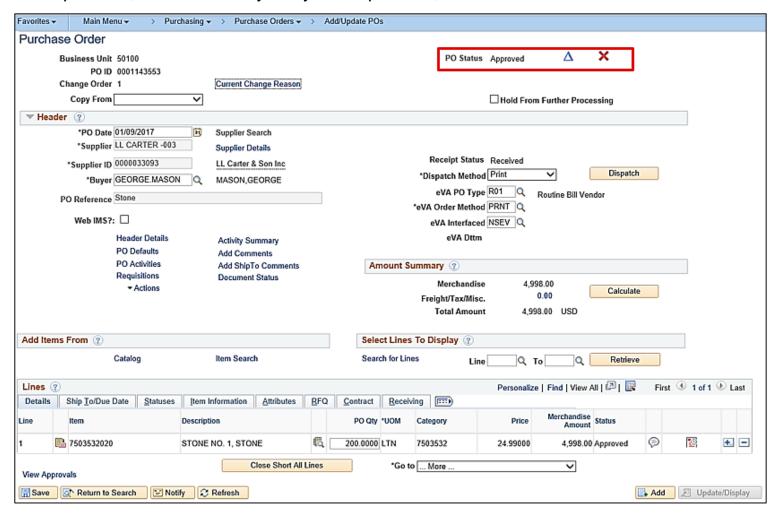

Reason Code Page

Reason Code OTHER

Help

- The PO Status updates to Approved and is ready for dispatch.
- Once dispatched, either manually or by batch process, the PO will be reconciled/closed out.

4

Reconciling/Close the PO

In this lesson, you learned:

 How to reconcile/close a PO by matching the quantity ordered, quantity received, and quantity matched/vouchered for a PO.

5

Review PO Information, History, and Activities

This lesson covers the following topics:

- Review PO Information, History, and Activities
- Purchase Order Inquiry page

Review PO Information, History, and Activities

After creating a PO, it is possible to view all future transactions and related activities, including the header, line, schedule, and distribution details. This can be done through the following pages:

- Purchase Order Inquiry page
- Activity Summary page
- Review Change History and Review Change Orders pages

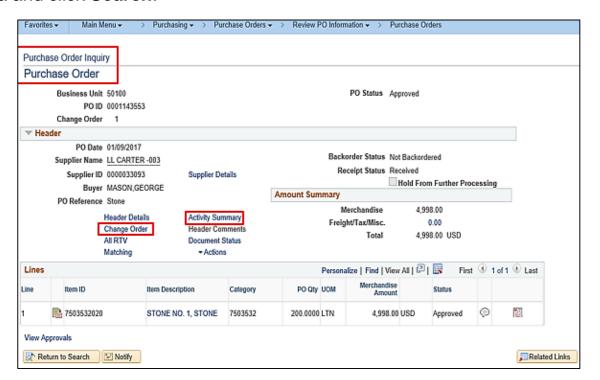

Purchase Order Inquiry Page

The **Purchase Order Inquiry** page allows viewing details of the PO. This page is a display-only version of the **Maintain Purchase Order – Purchase Order** page. From here, other pages, such as **Activity Summary** and **Change Order** can be displayed, where additional details of the PO can be viewed.

Navigate to this page using the following path:

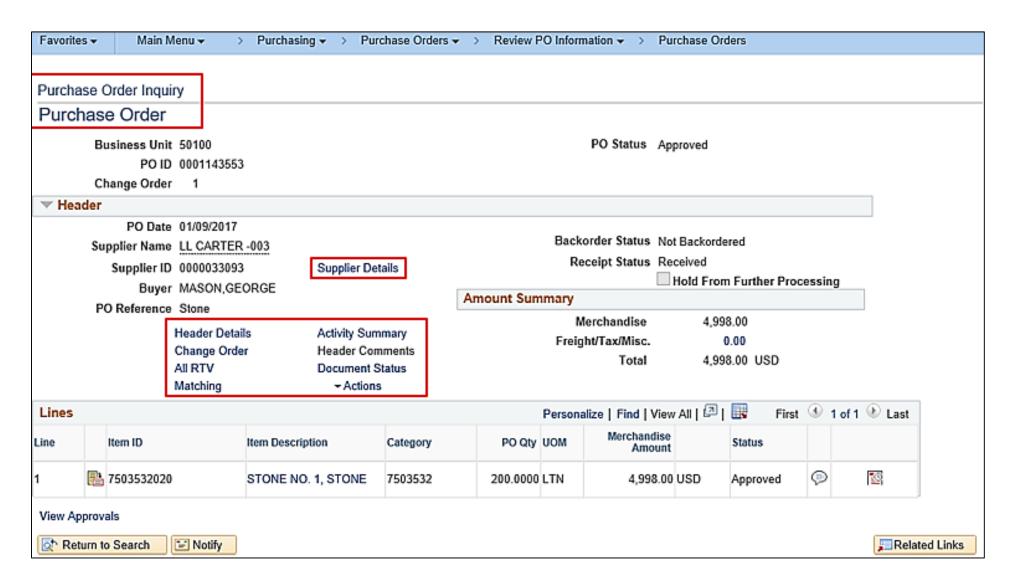

Main Menu > Purchasing > Purchase Orders > Review PO Information > Purchase Orders

Enter the search criteria and click **Search**.

Purchase Order Inquiry Page (continued)

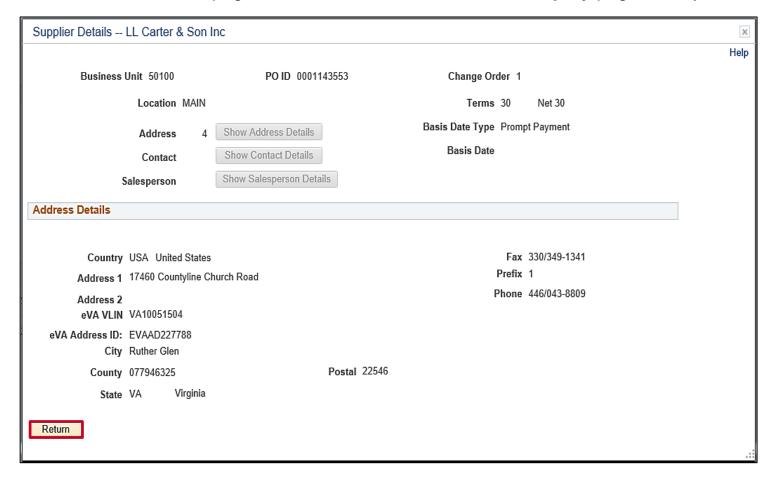

Purchase Order Inquiry Page: Supplier Details

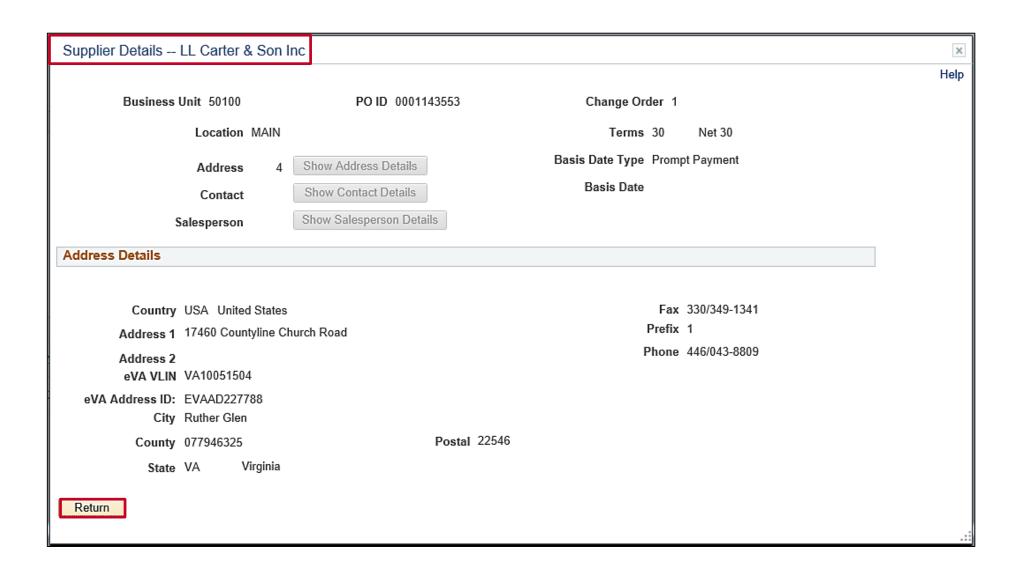

Click the **Supplier Details** link on the **Purchase Order Inquiry** page to display the **Supplier Details** pop-up window. This page displays more details about the supplier for the PO.

Click the **Return** button on the page to return to the **Purchase Order Inquiry** page when you are done.

Purchase Order Inquiry Page: Supplier Details (continued)

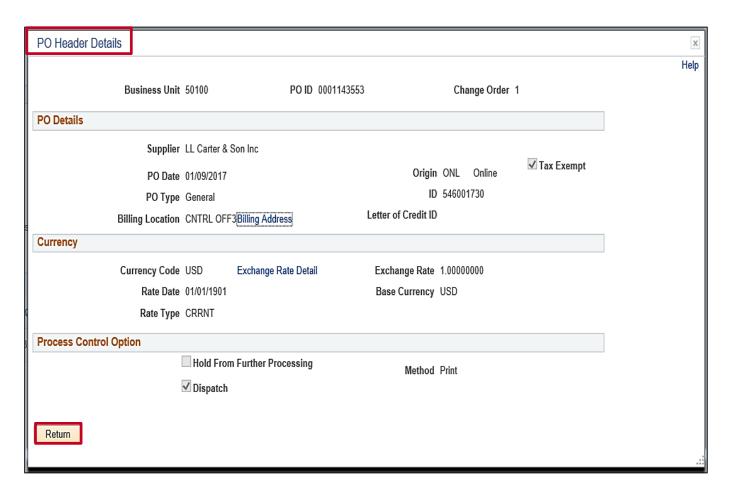

Purchase Order Inquiry Page: Header Details

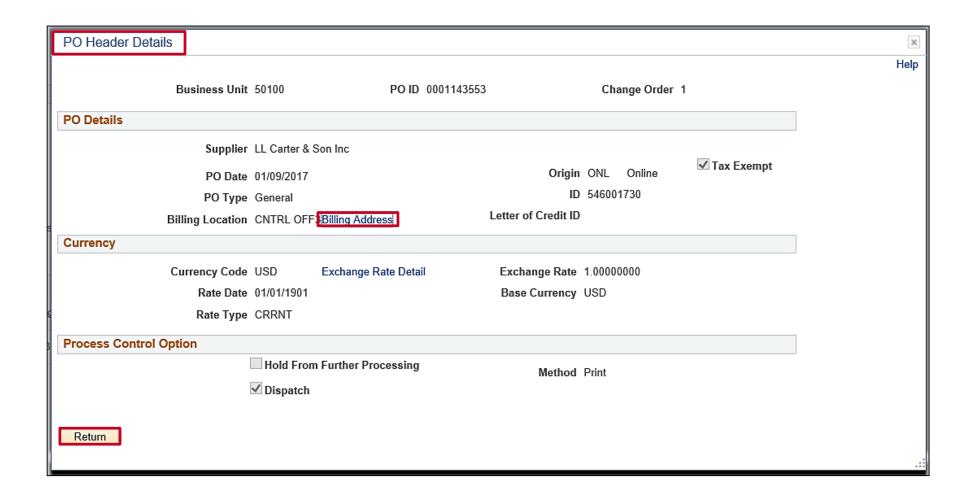

Click the **Header Details** link on the **Purchase Order Inquiry** page to display the **Purchase Order Header Details** pop-up window. This page displays the PO defaults and the rules for the PO.

Click the **Return** button on the page to return to the **Purchase Order Inquiry** page when finished.

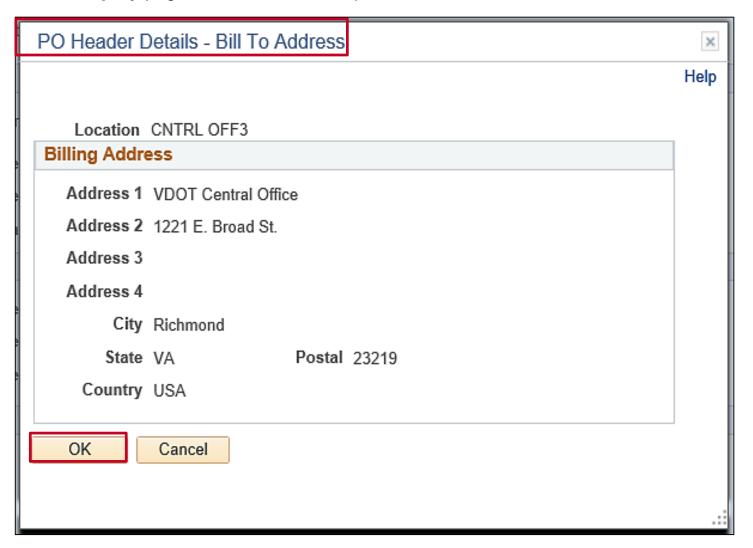

Purchase Order Inquiry Page: Header Details (continued)

Purchase Order Inquiry Page: Bill To Address

Click the **Billing Address** link on the **Header Details** page to display details for the billing location. Click the **OK** button to return to the **Purchase Order Inquiry** page when review is completed.

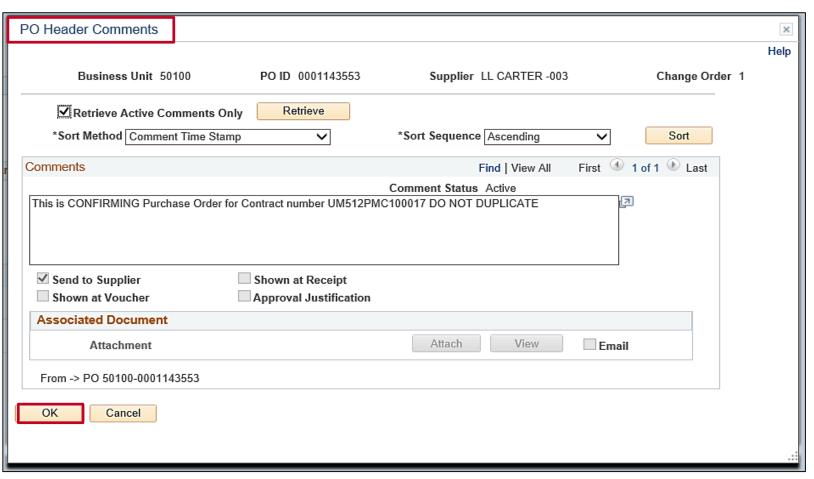

Purchase Order Inquiry Page: Header Comments

If the **Header Comments** link on the **Purchase Order Inquiry** page is active, click it to display comments associated with the PO header. If this link is not active, there are no comments.

Click the **OK** button to return to the **Purchase Order Inquiry** pop-up window.

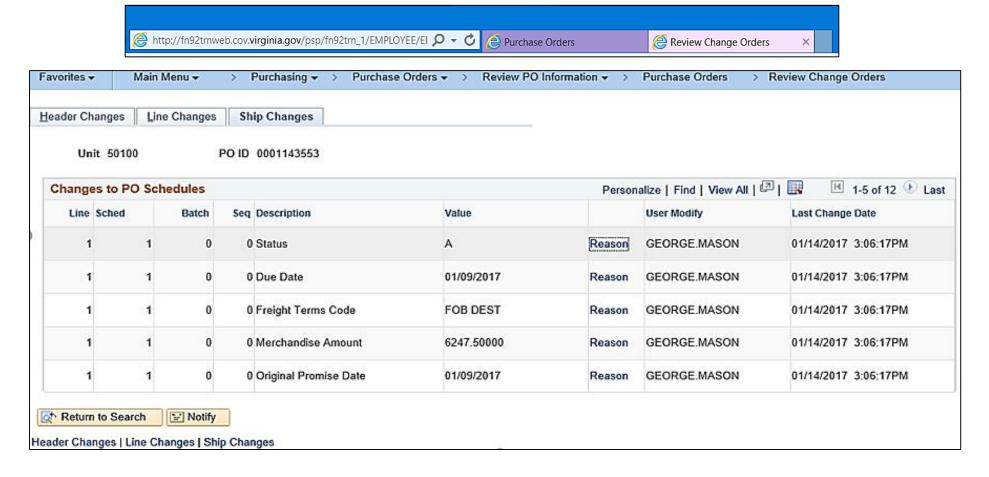

Purchase Order Inquiry Page: Change Order

Click the **Change Order** link on the **Purchase Order Inquiry** page to display the **Review Change Order** page. This page displays change order history for the PO, if any.

The Change Order page opens up as a separate internet tab. To return to the Purchase Order Inquiry page, click on the Purchase Orders internet tab or close the Change Order internet tab and return to the Purchase Order Inquiry page.

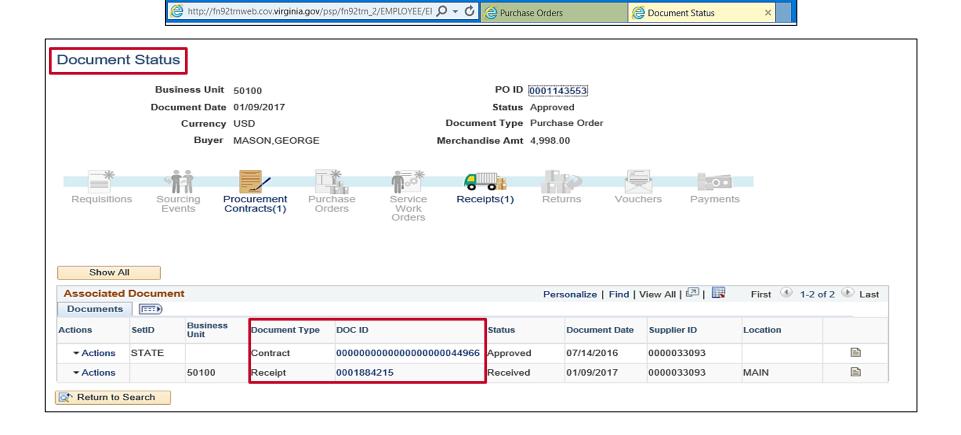

Purchase Order Inquiry Page: Document Status

Click the **Document Status** link on the **Purchase Order Inquiry** page to access and review information about procurement documents associated with the PO. These documents may include contracts, vouchers, receipts, and payments and links to each of the associated documents will be available.

The **Document Status** page opens up as a separate internet tab. To return to the **Purchase Order Inquiry** page, click on the **Purchase Orders** internet tab or close the **Document Status** internet tab and return to the **Purchase Order Inquiry**

page.

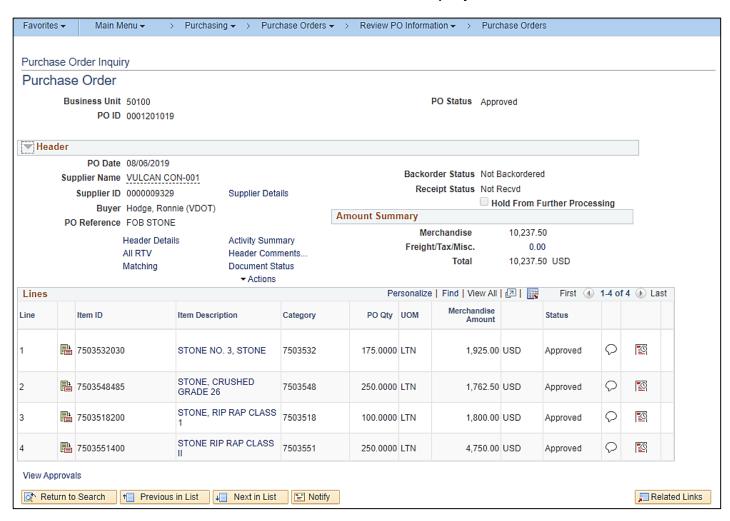

Purchase Order Inquiry Page: Lines

There are numerous details associated with the PO line that can be displayed from the Lines section on the Purchase Order

Inquiry page.

Purchase Order Inquiry Page: Line Details

When the **Line Details** icon in the **Lines** section of the **Purchase Order Inquiry** page, is clicked, the **Details for Line** pop-up window will be displayed. This page displays additional details associated with the selected PO line. Click the **Return** button to return to the **Purchase Order Inquiry** page.

Preferred Language Item Descr						
STONE NO. 3, STONE						
Return						

Purchase Order Inquiry Page: Line Comments

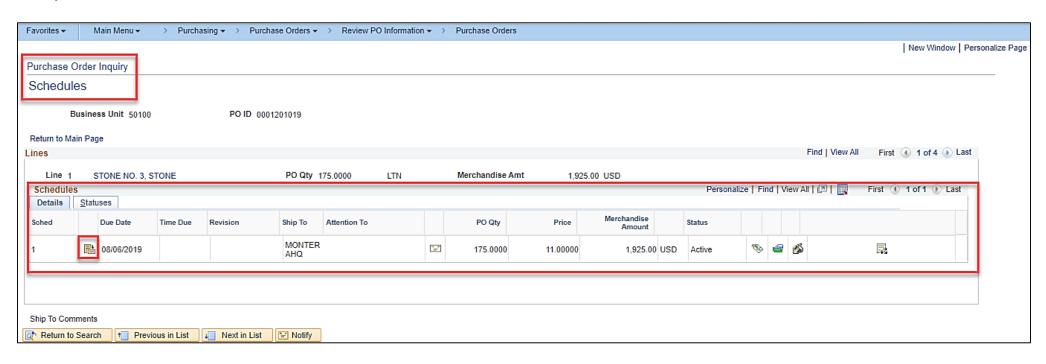

From the **Purchase Order Inquiry** page, click the **Line Comments** icon on the desired line to view comments that were entered for the item. The **PO Line Comments** pop-up window will be displayed. From the **PO Line Comments** page, click **OK** to return to the **Purchase Order Inquiry** page.

Purchase Order Inquiry Page: Schedule

There are many details associated with the schedule(s) for each PO line. To display the PO schedule(s) for a line, from the **Purchase Order Inquiry** page click the **Schedule Details** icon on the line to be viewed. The **Schedules** page displays for the PO line. Each schedule has links (icons) to more detailed information including schedule details, miscellaneous charges, and accounting distributions. The **Price Adjustment**, **Miscellaneous Charges**, and **Sched Sales/Use** tax icons are generally not used.

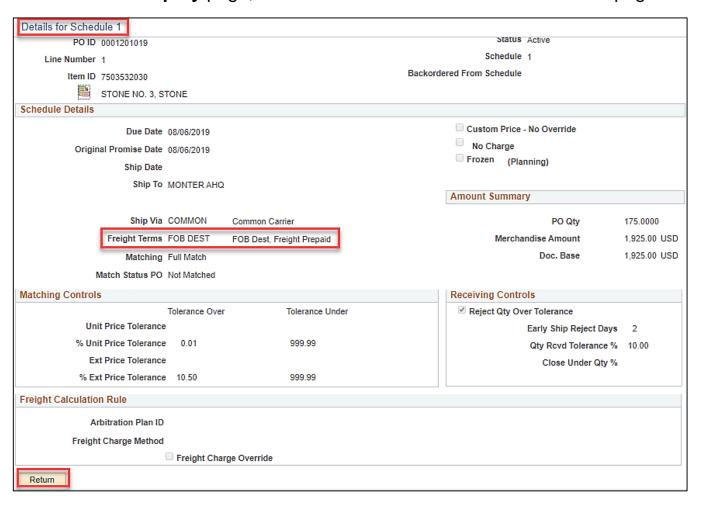

Purchase Order Inquiry Page: Schedule Details

From the **Purchase Order Inquiry – Schedules** page, click the **Schedule Details** icon for the desired schedule to view details about the schedule, including the **Freight Terms**.

To return to the **Purchase Order Inquiry** page, click **Return** and then from the **Schedules** page click the **Return to Main**

Page link.

Purchase Order Inquiry Page: Distributions

Accounting distributions are associated with schedules. Clicking the **Distributions/ChartFields** icon on the **Schedules** page displays the associated distributions.

The **ChartFields** tab displays the chart of accounts information related to the schedule. Typically scrolling right will display all the fields.

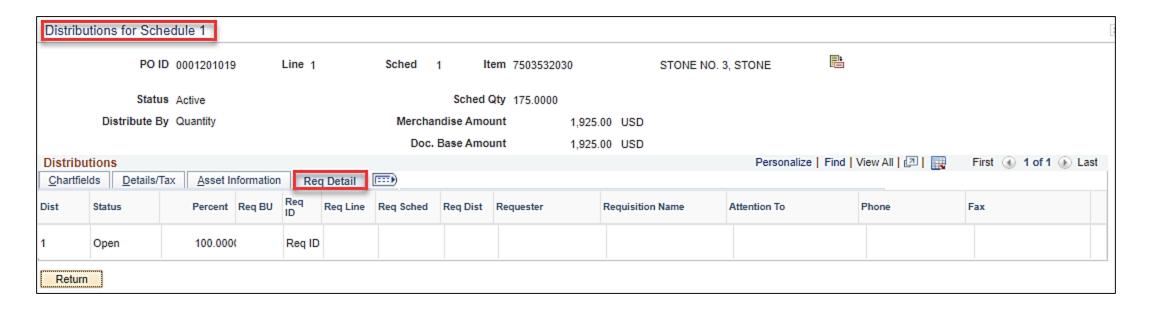

The **Details/Tax** and **Asset Information** tabs are not used.

Purchase Order Inquiry Page: Distributions, Req/Detail Tab

On the **Distributions** page, the **Req/Detail** tab displays information about associated requisitions. If there is a requisition, the **Req ID** is displayed here as a hyperlink. Click to get more information about the requisition.

Activity Summary Page

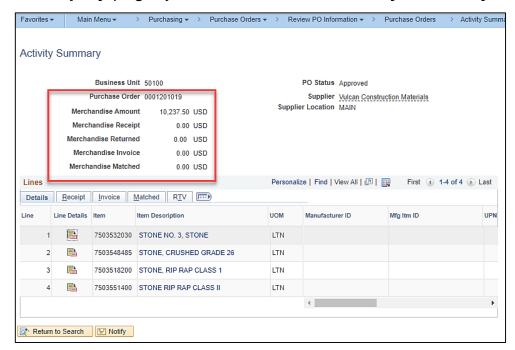

View what has been received on the **Activity Summary** page, you can view what has been received. The page will include information as well as links to more information for the associated receipt(s) and voucher(s).

The Merchandise Amount, Merchandise Receipt, Merchandise Returned, Merchandise Invoice, and Merchandise Matched values will be displayed on the Activity Summary page.

Navigate to this page using the following path:

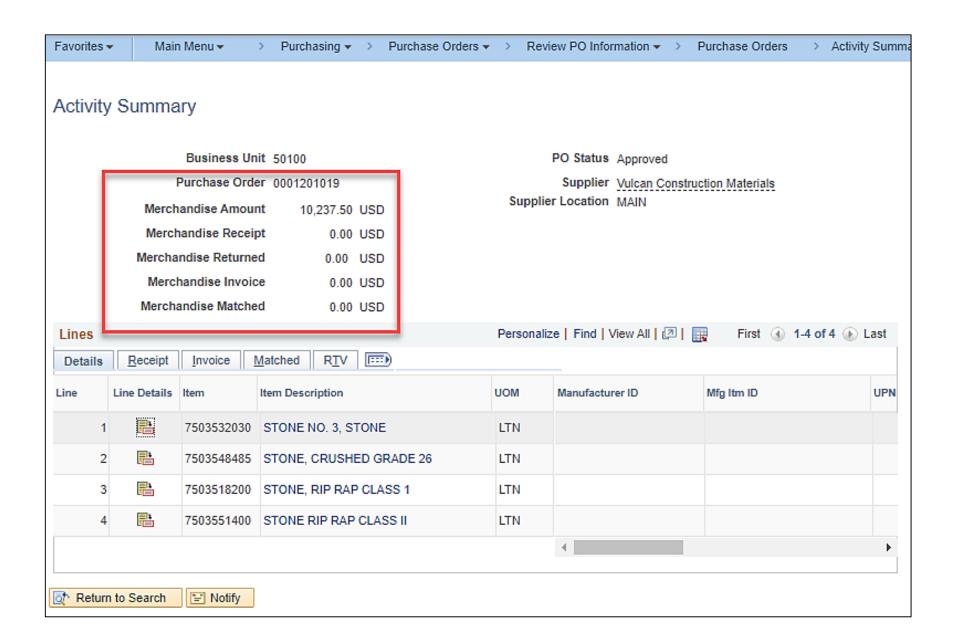

Main Menu > Purchasing > Purchase Orders > Review PO Information > Activity Summary

Or, from the Purchase Order Inquiry page, you can click on the Activity Summary link.

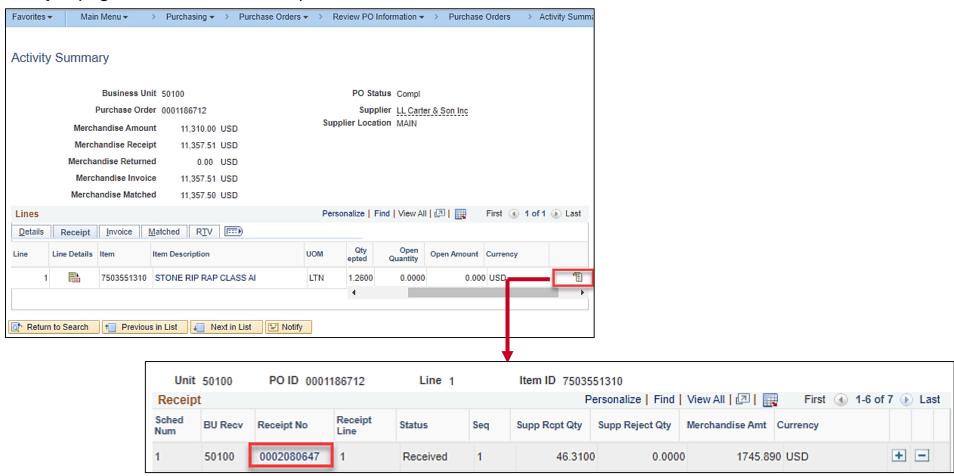

Activity Summary Page (continued)

Activity Summary Page: Receipt Tab

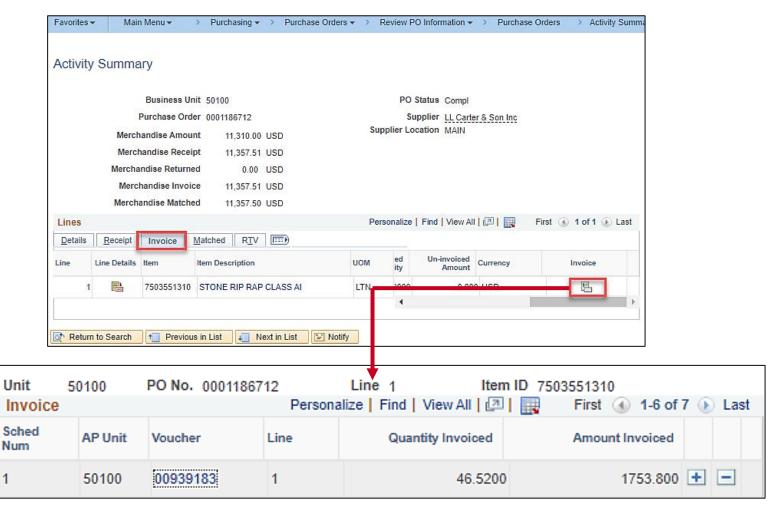

The **Receipt** tab is used to view additional information about receipt documents associated with the PO, such as quantity received and accepted. Click a **Receipt** icon to open the page that provides a list of all receipts and links that take you to a **Receipts** page to view detailed receipt information.

Activity Summary Page: Invoice Tab

The **Invoice** tab is used to view additional information about vouchers associated with the PO. Click an **Invoice** icon to open the page that provides a list of all the vouchers and links to a **Voucher Inquiry** page where to view detailed voucher information.

Review Change History and Review Change Orders Pages

Review the history (changes) of a purchase order on the **Review Change History** page or the **Review Change Orders** page.

Both pages allow searching for the desired PO and lists the change(s) that occurred to it on tabs which are almost identical. On the **Review Change History** page, you can search using **PO Number** and/or **Change Order Number**. This page provides details on the original PO, as well as changes.

The information is virtually the same on both pages, however the **Review Change History** page contains a **Batch** tab that is not included on the **Review Change Orders** page. The **Batch** tab displays the date that the change was made and the **Batch** ID of the batch that created the change order.

Navigate to the **Review Change History** page using the following path:

Main Menu > Purchasing > Purchase Orders > Manage Change Orders > Review Change History

Or, navigate to the **Review Change Orders** page using the following path:

Main Menu > Purchasing > Purchase Orders > Manage Change Orders > Review Change Orders

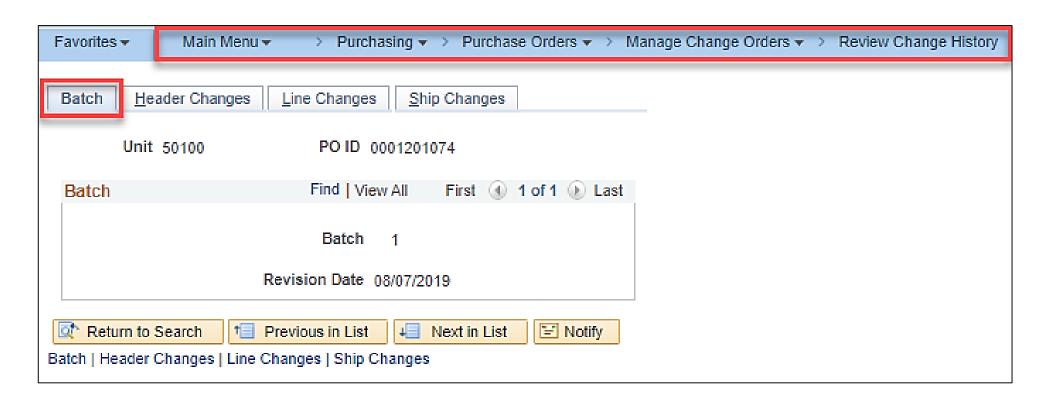

Enter the search criteria on either page and click **Search**.

Review Change History Page: Batch Tab

The **Review Change History** page includes four tabs that display different information about the change to the PO.

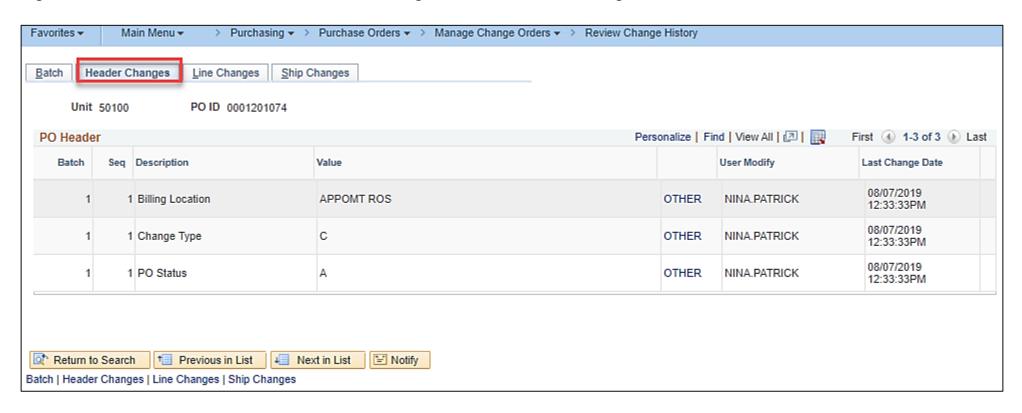

The **Batch** tab displays the date that the change was made and the **Batch** ID of the batch that created the change order.

Review Change History Page: Header Changes Tab

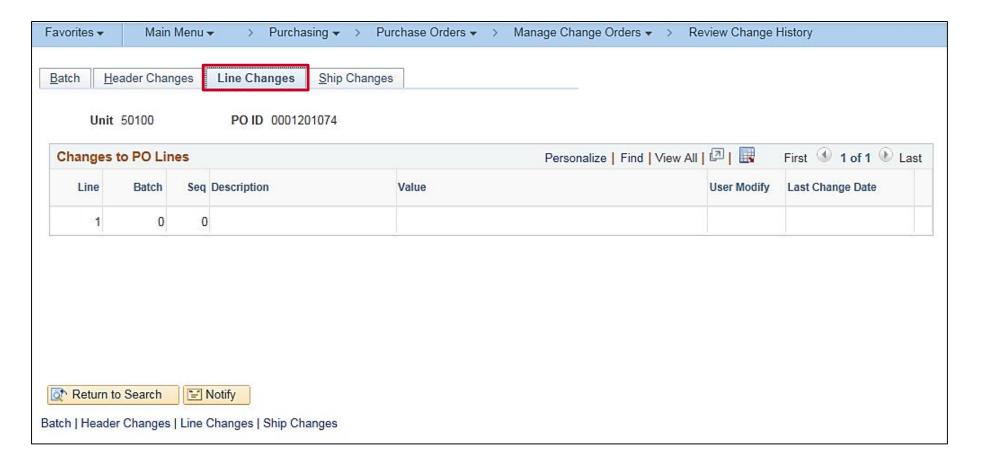

The **Header Changes** tab is on both the **Review Change History** and **Review Change Orders** pages and displays the changes to the header, which user issued the change, and the date of change.

Change History Page: Line Changes Tab

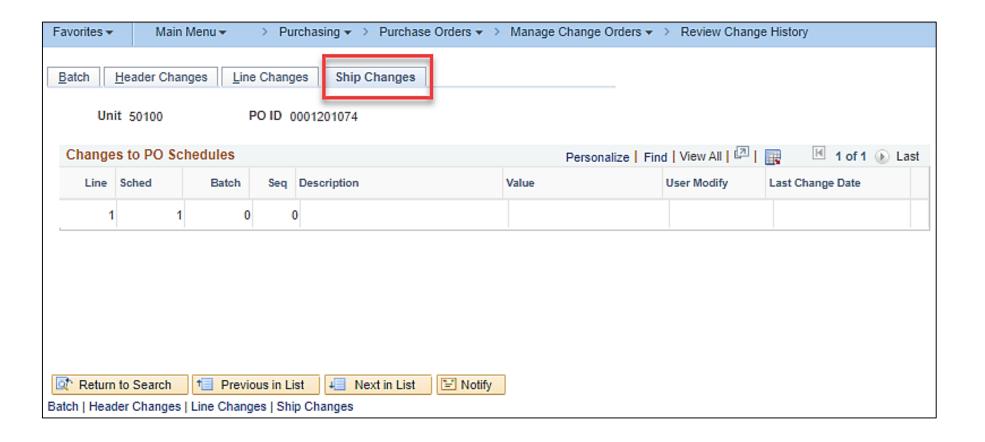

The **Line Changes** tab is on both the **Review Change History** and **Review Change Orders** pages and displays the changes to the PO line(s), the user who created the change, and the date of change.

Change History Page: Ship Changes Tab

The **Ship Changes** tab is on both the **Review Change History** and **Review Change Orders** pages and displays changes to the quantity and/or price, the user who created the change, and the date of change.

5

Review PO Information, History, and Activities

In this lesson, you learned:

- How to view details of a PO using the Purchase Order Inquiry.
- How to review the change order history of a PO using the Review Change History and Review Change Orders pages.

PR344

Processing Purchase Orders

In this course, you learned:

- Describe Purchase Order Concepts, Processes, Integration, and Interfaces
- Create Purchase Orders
- Review and Manage Purchase Orders
- Cancel Purchase Orders
- Create a Purchase Order Change Order
- Reconcile/Close POs 3 Way Match

Congratulations! You successfully completed the **501 PR344: Processing Purchase Orders** course.

Your instructor will provide instructions on how to access the evaluation survey for this course.

- Key Terms
- Flowchart Key

Change Order: A change order is created when you make a change to a PO that affects the **Quantity**, **Price**, or **Ship To** fields or when a **Line** is added.

Matching: Matching purchasing documents for key values lends assurance to the validity and correctness of transactions and cash payments. The matching process compares vouchers with POs and receiving documents. This helps ensure that you pay for only the goods and services that you order and receive.

Purchase Order: Purchase Orders (POs) are commitments from an agency to suppliers to purchase goods or services from that supplier. The purchase information, such as item, quantity, freight terms, shipping terms, payments terms, and shipping instructions, is listed on the document and is part of the contractual nature of the PO.

Step Description	Depicts a process step or interface.	Start	Indicates point at which the process begins. Does not represent any activity.
Batch Process	Specifies a batch process.	End	Indicates point at which the process ends. Does not represent any activity.
Manual Operation	Depicts a process step that is preformed manually.	Document	Depicts a document of any kind, either electronic or hard copy.
Decision Outcome	Defines the possible outcomes of a decision or analysis that took place in a step immediately preceding.	X	Indicates an on-page or intra process connector. Used to avoid complex overlapping connector lines or to continue a process on a subsequent page.
Entity Name	Represents an entity (person, organization, etc.).	Step/ Process	Connects steps between business processes.
